

Durango Resources Inc. Seeks CFIA Certification for Limestone as Fertilizer

05.04.2017 | [The Newswire](#)

Vancouver, April 5, 2017 - [Durango Resources Inc.](#) (TSX.V-DGO) (OTC-ATOFX), (the "Company" or "Durango") announces that management has initiated discussions with the Canadian Food Inspection Agency (CFIA) in relation to using its limestone for fertilizer use.

Fertilizer and supplement products are regulated under the authority of the Fertilizers Act, which is administered by the CFIA.

Limestone is extremely beneficial for the agricultural industry, as the chemical properties of agricultural lime can significantly boost the profit yield of farms and increase efficiencies of the fertilizers of up to 50% increasing crop yields and profitability.

The limestone is activated when it meets with water and dissolves into the soil, which lowers the acidity and raises the pH, which is essential for crop yields. The lime also adds desirable nutrients to the soils such as calcium, magnesium and phosphorus, which can improve soil structure, increase rates of air and water infiltration, improve plant cell wall formation, and help to regulate the nutrient uptake through the roots of the plant. Hydroponic systems are more prone to incur a calcium deficiency and require the use of limestone, therefore Durango is investigating the synergy of agricultural limestone for such soil conditioning mediums.

Further details on the suitability of Durango's limestone for use as a fertilizer will be provided as they become available.

About Mayner's Fortune

The Mayner's Fortune property is located 7.5 kilometres southwest of Terrace, B.C., along the CN rail route between Terrace and Kitimat and hosts six historically mapped subparallel limestone units. Durango completed two exploration visits on the Mayner's Fortune project in the late fall of 2016, which included sampling to test limestone quality and mapping substantiate historic reports. Assays results as announced on February 8, 2017 and December 14, 2016 achieved very high calcium carbonate levels.

About Durango

Durango is a natural resources company engaged in the acquisition and exploration of mineral properties. The Company has a 100% interest in the Mayner's Fortune and Smith Island limestone properties in northwest British Columbia, the Decouverte and Trove gold properties in the Abitibi Region of Quebec, and the NMX East lithium property near the Whabouchi mine and the Buckshot graphite property near the Miller Mine in Quebec, the Whitney Northwest property near the Lake Shore Gold and Goldcorp joint venture in Ontario.
