Company Profile:

AMR owns and operates one of the world's few sources of nickel sulphide ore, and is exploring for additional high-grade nickel assets in Vietnam. AMR commenced commercial production from its 90%-owned Ban Phuc Nickel Mine in Vietnam in mid-2013. As of 30 June 2016, the Ban Phuc Nickel Mine has produced a total of c. 20,000 tonnes of nickel and c. 10,000 tonnes of copper contained in concentrate, plus a cobalt by-product since the beginning of its mine life. Mining and processing operations at Ban Phuc were suspended in September 2016 and operations were transitioned to a care and maintenance scenario. In addition to in and near-mine expansion projects, Ban Phuc provides a platform from which AMR can continue to focus on developing a new nickel camp within its 150km² of concessions located throughout the highly-prolific Song Da rift zone, where AMR has a number of advanced-stage nickel exploration targets.
