

American Manganese Inc. to Present at AAll: the American Association of Individual Investors in Scottsdale, Arizona

07.04.2017 | [FSCwire](#)

On Advanced Battery Recycling that will Focus on Recycling Lithium Ion Electric Vehicle Batteries

Vancouver - Larry W. Reaugh, President and Chief Executive Officer of [American Manganese Inc.](#) (NYSE:AMN; American Manganese Inc.; or AMN; or the Company;), (TSX.V: AMY; Pink Sheets: AMYZF; Frankfurt: 2AM), is pleased to announce that the Company and Kemetco Research Inc. will be presenting on AMY's advanced battery recycling at 12:00 noon, Saturday, April 8, 2017 in Scottsdale, Arizona. The AAll workshop will take place in the Jewish Community Center of Scottsdale, Arizona.

The workshop will be attended by Mr. Norman Chow of Kemetco Research Inc., and Mr. Larry Reaugh, President and Chief Executive Officer of [American Manganese Inc.](#) Mr. Chow will make a technical presentation about American Manganese Inc.'s patent pending process for recycling cathode material from spent lithium ion batteries.

About Kemetco Research Inc.

Kemetco Research Inc. is a privately-owned contract research and development company specializing in extractive metallurgy, chemical processing and specialty chemical analysis. It was formed after the acquisition of the industrial process division of B.C. Research, which had been in operation for over 60 years as a research and development contractor in British Columbia.

About American Manganese Inc.

[American Manganese Inc.](#) is a diversified specialty and critical metal company focused on capitalizing on its patented intellectual property through low cost production or recovery of electrolytic manganese products throughout the world, and recycling of spent electric vehicle lithium ion rechargeable batteries.

Interest in the Company's patented process has adjusted the focus of [American Manganese Inc.](#) toward the examination of applying its patented technology for other purposes and materials. [American Manganese Inc.](#) aims to capitalize on its patented technology and proprietary know-how to become and industry leader in the recycling of spent electric vehicle lithium ion batteries having cathode chemistries such as: Lithium-Cobalt, Lithium-Cobalt-Nickel-Manganese, and Lithium-Manganese (Please see the Company's January 19, 2017 press release for further details).

The company has updated their PowerPoint which can be viewed here.

On behalf of Management
