

OTTAWA, ON / ACCESSWIRE / April 17, 2017 / [Carube Copper Corp.](#) (TSX-V: CUC) Jeff Ackert, President and CEO, is pleased to confirm that Carube Copper has received the official transfer documents from the Jamaican Ministry of Transportation and Mines for seven Special Exploration and Prospecting Licences previously held by OZ Minerals. Carube Copper now has 100% ownership of eleven Licenses covering 535 square kilometres in Jamaica.

Mr. Ackert emphasized, "Now that the Licenses are 100% in the company's name, we can move forward with aggressive exploration programs on our flagship Bellas Gate Project and the newly acquired highly prospective licences. Armed with the \$14M exploration data package from OZ Minerals as well as our recently closed \$1.6M financing, we plan to start our programs immediately."

Figure 1: Carube Copper's 100% owned licences in Jamaica totalling 535 square kilometres.

Jamaica is a highly favourable, stable jurisdiction for exploration and mining with strong support from the relevant Ministry, as well as the Commissioner of Mines and Geology. The country's Cretaceous aged inliers host numerous copper and gold porphyry occurrences.

To date, Carube Copper has identified seven porphyry centres at the Bellas Gate Project, alone. Many identified prospective areas on all Licenses have yet to be drill tested. Drill results have indicated strong and consistent mineralization in well altered porphyry style sequences. Highlights of drilled intersections are given in the following table.

The reported intervals do not necessarily indicate true width of mineralization, as its geometry is not known. Intervals calculated using unlimited internal dilution. Copper equivalents are calculated using a US \$3.00/lb. copper and a US\$1200 per ounce gold price assuming 100% recovery of both metals. QP Statement: This press release has been reviewed and approved by Dr. Vern Rampton, P. Eng. in his capacity as a qualified person as defined under NI 43-101.

[Carube Copper Corp.](#) (TSX-V: CUC) is a Canadian exploration company focused on the exploration and development of copper and gold projects in Jamaica and Canada. In Jamaica, Carube Copper holds a 100% interest in 11 licences, totalling 535 square kilometres. In Canada, it holds a 100% interest in three porphyry copper-gold-molybdenum properties, totalling 593 square kilometres within the Tertiary-aged Cascade Magmatic Arc in southwestern British Columbia. Exploration continues on these properties with the goal of joint-venturing them to larger exploration and mining companies. Carube Copper continues to seek opportunities in Canada and the Caribbean for acquisition and development.
