

Adamera Minerals Corp. Receives Drilling Permit on State Land - Drilling to Begin in May

18.04.2017 | [The Newswire](#)

Vancouver, April 18, 2017 - [Adamera Minerals Corp.](#) (TSX-V: ADZ) announces it has received drill permits for targets located on State lands within the Cooke Mountain project in Washington State. Targets permitted include Big Banana, CM-SE-2 and CM-SE-6. Four additional targets currently being refined are also permitted. Separate applications are progressing for drilling on federal land.

A first pass drilling program of 3000 metres to test 8 - 10 targets is scheduled to begin in May. Access considerations will determine the order in which the targets are drilled.

Adamera is currently interpreting data from soil sampling and an airborne VTEM survey completed in late 2016. Eight compelling targets have been identified with additional targets currently being defined for inclusion in the drilling program.

"Working cooperatively with the various public land agencies to obtain permits for responsibly conducted drilling is a prime objective for Adamera" states Mark Kolebaba, President and CEO of Adamera Minerals.

About Adamera

[Adamera Minerals Corp.](#) is exploring for high-grade gold deposits within hauling distance of the operating Kettle River Mill in Northeastern Washington State. While management feels the existing third-party mill and superior logistics allow a smaller resource to be potentially economic, Adamera's primary goal is the discovery of a large stand-alone high grade gold resource. Adamera is the dominant regional exploration company in the area.

On behalf of the Board of Directors,

Mark Kolebaba

President & CEO
