<u>California Resources Corp.</u> (NYSE: CRC) and Macquarie Infrastructure and Real Assets (MIRA) announced today that they have formed a strategic joint venture in which MIRA has committed to fund \$160 million for the development of oil and gas properties in California, with a focus on development opportunities in the San Joaquin Basin. Subject to the discretion of the parties, MIRA may increase its total investment to up to \$300 million.

The initial commitment, relating to multiple development opportunities in CRC's Kern Front, Mt. Poso, Pleito Ranch and Wheeler Ridge fields, is intended to be invested over two years in accordance with an already mutually approved development plan. MIRA will fund 100 percent of the development wells in which it will earn a 90 percent working interest. CRC's working interest will revert from 10 to 75 percent upon MIRA achieving an agreed return.

Todd Stevens, President and CEO of CRC, noted, " We are pleased to partner with MIRA to bring forward the value of our large and long lived inventory and help to derisk and accelerate the development of CRC' s vast resource base. The joint venture also provides additional flexibility to aid in our deleveraging efforts through growing our production and cash flow."

&Idquo;MIRA is pleased to form this strategic partnership with CRC to develop these high quality oil and gas properties in a world class basin," said Paul Beck, Senior Managing Director in Macquarie Infrastructure and Real Assets. &Idquo;We are attracted to CRC's operational expertise, technical understanding and substantial infrastructure in the San Joaquin Basin."

Forward Looking Statement Disclosure

This press release contains forward-looking statements that involve risks and uncertainties that could materially affect our expected results of operations, liquidity, cash flows and business prospects. Such statements include those regarding our expectations as to the disclosed joint venture. Factors (but not necessarily all the factors) that could cause results to differ include:

- commodity price changes
- legislative or regulatory changes, including those related to drilling, completion, well stimulation, operation, maintenance or abandonment of wells or facilities, managing energy, water, land, greenhouse gases or other emissions, protection of health, safety and the environment, or transportation, marketing and sale of our products
- unexpected geologic conditions
- equipment, service or labor price inflation or unavailability
- availability or timing of, or conditions imposed on, permits and approvals
- lower-than-expected production, reserves or resources from development projects higher-than-expected decline rates
- disruptions due to accidents, mechanical failures, transportation constraints, natural disasters, labor difficulties, cyber attacks or other catastrophic events
- factors discussed in " Risk Factors" in our Annual Report on Form 10-K available on our website at crc.com.

Words that reflect the prospective nature of events or outcomes typically identify forward-looking statements. Any forward-looking statement speaks only as of the date on which such statement is made and we undertake no obligation to correct or update any forward-looking statement, whether as a result of new information, future events or otherwise, except as required by applicable law.
