

Lithium Corporation Begins Work on Tantalum-Niobium Prospects

20.06.2017 | [FSCwire](#)

Elko - [Lithium Corporation](#) [OTCQB:LTUM] (the Company) is pleased to announce that it has begun field work on the Michael and Yeehaw prospects in British Columbia. The preliminary phase is a helicopter-borne vegetation geochemical survey that will allow us to cover a large area in a short time. This survey will better localize the source of the strong Tantalum; Niobium stream sediment geochemical anomalies that have been detected here. Once the results from this program are received the data generated will be assimilated into the dataset, and [Lithium Corp.](#) will then focus further geological and geochemical work in the areas of the claims determined to be most prospective.

As outlined in earlier press releases, the Company has the option to earn a 100% interest in three separate claim blocks under the terms of the March 31, 2017 agreement between [Lithium Corp.](#) and Bormal Resources Inc.

About Lithium Corporation

[Lithium Corp.](#) is an exploration company based in Nevada devoted to the exploration for energy storage related resources throughout North America, looking to capitalize on opportunities within the ever expanding next generation energy storage markets. The Company maintains a strategic alliance with Altura Mining, an ASX listed natural resource development company that is currently developing its 100% owned world-class Pilgangoora lithium pegmatite property in Western Australia.

Notice Regarding Forward-Looking Statements

This current report contains "forward-looking statements," as that term is defined in Section 27A of the United States Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Statements in this press release which are not purely historical are forward-looking statements and include any statements regarding beliefs, plans, expectations or intentions regarding the future.

Actual results could differ from those projected in any forward-looking statements due to numerous factors. Such factors include, among others, the inherent uncertainties associated with mineral exploration and difficulties associated with obtaining financing on acceptable terms. We are not in control of minerals prices and these could vary to make development uneconomic. These forward-looking statements are made as of the date of this news release, and we assume no obligation to update the forward-looking statements, or to update the reasons why actual results could differ from those projected in the forward-looking statements. Although we believe that the beliefs, plans, expectations and intentions contained in this press release are reasonable, there can be no assurance that such beliefs, plans, expectations or intentions will prove to be accurate. Investors should consult all of the information set forth herein and should also refer to the risk factors disclosure outlined in our most recent annual report for our last fiscal year, our quarterly reports, and other periodic reports filed from time-to-time with the Securities and Exchange Commission.
