

# King's Bay Applies for Exploration Permit for Phase 2 Exploration on the Lynx Lake Project in Labrador

06.07.2017 | [FSCwire](#)

Vancouver - [King's Bay Gold Corporation](#) (TSX.V: KBG) (FSE: KGB1), operating as King's Bay, a mineral exploration company based in Vancouver submits application to Newfoundland and Labrador Government, Department of Natural Resources for the commencement of phase 2 of the exploration program in south eastern Labrador.

Phase 2 of the Lynx Lake exploration program will involve ground truthing for the recently flown VTEM survey, which highlighted an area of low resistivity in the western pit of mineralization. The size of the anomaly is anticipated to be ranging in depth from 50-300 meters and estimated to be approximately 400 meters in diameter. The west pit has been historically sampled yielding assays of up to 1.03% Copper, 0.56% Cobalt, 0.23% Vanadium, 0.10% Nickel and 5.0g/t Silver.

The exploration program will consist of a localized ground electromagnetic survey over the anomaly at 20-meter line spacing. It will also include reconnaissance for bedrock exposure in the underexplored anomalous area that runs south of the west pit.

## About Lynx Lake

The Lynx lake Project has returned historical grab samples assaying up to 1.39% Cu, 0.94% Co, 0.21% Ni and 6.5g/t Ag. Government regional low resolution residual magnetic surveys and preliminary handheld electromagnetic unit surveys done by local prospectors have shown strong conductors beneath the overburden, and provide incentive to explore the area further for additional subsurface mineralization. The Project is located directly adjacent to a 3 phase powerline and the Trans-Labrador Highway.

## About King's Bay

King's Bay is focused on the exploration of cobalt and other high tech metals in North America. The company believes in this emerging fast growth sector and will continue to seek out and evaluate properties that show promise for development. King's Bay Gold Corp is operating as King's Bay.

On Behalf of the Board,

Kevin Bottomley  
CEO, President

*Forward-Looking Statements: This news release contains forward-looking information which is subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ from those projected in the forward-looking statements. These forward-looking statements are subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those projected in the forward-looking information. Risks that could change or prevent these statements from coming to fruition include that the Company may not raise sufficient funds to carry out our plans, changing costs for mining and processing; increased capital costs; the timing and content of upcoming work programs; geological interpretations based on current data that may change with more detailed information; potential process methods and mineral recoveries assumption based on limited test work and by comparison to what are considered analogous deposits that with further test work may not be comparable; the availability of labour, equipment and markets for the products produced; and despite the current expected viability of the project, that the minerals on our property cannot be economically mined, or that the required permits to build and operate the envisaged mine cannot be obtained. The forward-looking information contained herein is given as of the date hereof and the Company assumes no responsibility to update or revise such information to reflect new events or circumstances, except as required by law.*
