

FINANCE VIDEO: Lithium Power International Ltd - Lithium Resource Upgrade Exceeds Expectations

13.07.2017 | [ABN Newswire](#)

Lithium Power International (ASX:LPI) has announced a resource upgrade at their Maricunga lithium brine project in Chile.

Highlights of the announcement include:

- 270% increase to the JORC resource - 2.1Mt Lithium Carbonate Equivalent (LCE) and 5.6Mt of Potassium Chloride (KCl);
- Grade - 1,163 mg/l lithium - remains one of the highest grade brine projects globally;
- Exploration target - 1Mt to 2.5 Mt LCE & 3Mt to 6.6 Mt KCl;
- Pre-Feasibility Study - 4Q17.

Analyst Comment: The Maricunga project in our opinion is fast becoming the standout development lithium brine project globally. This resource upgrade (2.1 Mt LCE) was an excellent achievement and surpassed our previous expectations (1.5Mt LCE - TSI estimate).

Importantly the increase in resource size was not at the expense of the projects exceptional grade (1,163 current vs. 1,250 previous), as Maricunga remains one of the highest grade lithium brine projects globally.

We believe this resource is more than sufficient to support a long life operation (TSI estimate - 26 years), and will underpin the Pre-Feasibility study which will be released towards the end of the next quarter (4Q17). About Lithium Power International Ltd:

[Lithium Power International Ltd.](#) (ASX:LPI) (FRA:24L) is a pure-play lithium explorer and developer, focusing on developing and fast-tracking to production the high-grade Maricunga lithium brine project in Chile.

LPI has a well known performing technical team with the experience to take the Maricunga project all the way through the development stages to production.

The regions that LPI is currently focussed on are:

1. Maricunga JV (Chile) – On 13th September 2016, Lithium Power announced the creation of a new JV to develop the world-class Maricunga lithium brine deposit in northern Chile.

2. Pilbara (Western Australia) – LPI has one granted exploration tenement and two pending exploration applications covering 203km² in the Pilbara region of northern Western Australia. The largest granted exploration tenement is at Pilgangoora-Houston Creek is 2-3km west of the Pilbara Minerals (PLS.ASX) and Altura Mining (AJM.ASX) lithium deposits.

3. Greenbushes (Western Australia) – LPI has two granted exploration tenements covering 400km² in the Greenbushes area of southern Western Australia. The tenements are adjacent to the world's largest hard rock lithium mine owned & operated by Tianqi/Talison.

4. Centenario (Argentina) – Through its Argentinian subsidiary, Lithium Power holds a total of 6 granted tenements in the Centenario lithium brine salar within the Salta province of the Puna Plateau. In total, the 6 granted tenements cover an area of 61.52km². In addition, there is 1 further tenement in the grant review stage.

With the exception of the Maricunga JV, all tenements are 100% owned by LPI or LPSA (including rights to the Centenario tenement which is the subject of review by the Argentinian mining authorities).
