MINING

A total of 4.7 million tons of ore and waste were mined in the second quarter, including 1.0 million tons of ore; tracking in-line with the budgeted projection. The second quarter of 2017 operating costs were at \$13.48 per ton processed as compared to the first quarter costs of \$16.08. The reduction in costs is a result of an improved utilization rate and increased tonnage from the mine. There was also a reduction in downtime and increased efficiencies.

Mining continues in the Northwest pit and Main pit, phase 1. Mining of waste from the East pit is ongoing in an effort to prepare the area for ore mining later in the year. A total of 1.03 million tons were processed and stacked on the leach pad. The quarter's daily average was 11,273 tons; improving from the previous quarter average of 10,200 tons. The phase 2 leach pad was completed and placed in service in late July.

Gold production commenced in April 2016. A total of 43,068 ounces of gold and 311,293 of silver have been produced as at June 30, 2017.
