All samples have been sent to SGS Canada Inc. facilities in Lakefield, Ontario (&ldquo;SGS&rdquo;) for analysis by Inductively Coupled Plasma methods. These laboratories are recognized by the industry and accredited ISO/MEC 17025 by the Standards Council of Canada. In addition to the quality assurance and quality control (&ldquo;QA/QC&rdquo;) employed by SGS, Jourdan Resources develops a rigorous QA/QC protocol for its operators, including the insertion of analytical standard samples, duplicates and coarse silica blanks on a systematic basis. To determine the QC warning,  $\pm 2x$  Std. Dev., and QC failure  $\pm 3x$  Std. Dev. were used. QC results did not highlight any significant analytical bias.
