

VANCOUVER, British Columbia, Sept. 19, 2017 (GLOBE NEWSWIRE) -- [Canadian Zeolite Corp.](#) (the "Company") (TSX.V:CNZ) (OTCQB:CNZCF) (FSE:ZEON) is pleased to report it has established a foot-hold in the large Ontario animal feed, bedding and composting markets. The Company is receiving repeat container orders (48,400 lbs per container) for its Bromley Creek processed zeolite and is also seeing significant growth and repeat container orders in Western Canada for various zeolite products and processed sized zeolite.

Canadian Zeolite works closely with Absorbent Products Ltd (APL) under a Mining Operations Agreement to ensure mining operations and product processing is conducted at the highest standards as we continue to commercialize the Bromley Creek zeolite. We are currently transporting crushed zeolite from the mine site to APL's mill in Kamloops for processing and packaging. In mid-October inventory will be increased at the mine to meet the demands for the upcoming season.

"We are delighted with the progress the Company is making in sales through our distributors, in-house sales and through APL's National and International sales networks. Repeat orders confirm the effectiveness of our Bromley Creek zeolite and the increasing demand for our zeolite. We are very pleased to be a supplier for one of Canada's largest independent feed mills through Canadian Zeolite's distributor Ross Enterprises Limited of Ontario as well as to our distributors in Western Canada including Bella Turf (with dealers across Canada) and Shift Supplies Ltd. Canadian Zeolite continues to invest in research, development and testing initiatives to dramatically increase our reach into the many markets that would benefit from our zeolite," stated Ray Paquette CEO.

Mr. Paquette continued, "one of our research collaboration and product development initiatives is with the University of Northern British Columbia. The research will focus on three key areas; water filtration - for communities dealing with contaminated water, growing mediums - for consumable products and a seedling program for forestry, composting - for odor reduction and creating a value-add compost for municipalities across Canada."

Canadian Zeolite is well-positioned to meet the growing demands of the Canadian and US markets with its Bromley Creek zeolite, processing, packaging, and shipping capability. The Company is currently establishing global relationships to ensure a zeolite supply for identified markets which are not logistically viable from our British Columbia operations.

On behalf of the Board of Directors
"Ray Paquette"
