

# Alamos Gold Reports Record Third Quarter 2017 Production

12.10.2017 | [Marketwired](#)

## Record 55,800 ounces Produced at Young-Davidson

TORONTO, ONTARIO--(Marketwired - Oct 12, 2017) - Alamos Gold Inc. (TSX:AGI) (NYSE:AGI) ("Alamos" or the "Company") today reported record third quarter 2017 gold production of 107,000 ounces. Quarterly revenues totaled \$129 million from the sale of 100,551 ounces of gold at an average realized price of \$1,281 per ounce.

"Operationally we delivered a strong third quarter with record production and significant milestones achieved at both our operating mines. This included the completion of the MCM waste pass at Young-Davidson, contributing to higher underground mining rates in September, and initial production from our La Yaqui mine in the Mulatos district. We expect both will be key drivers of strong free cash flow growth in the fourth quarter and we remain well positioned to achieve full year guidance," said John McCluskey, President and Chief Executive Officer.

## Third Quarter 2017 Operating Highlights

- Record quarterly production of 107,000 ounces of gold including record production of 55,800 ounces from Young-Davidson, 36,300 ounces from Mulatos and 14,900 ounces from El Chanate
- Sold 100,551 ounces of gold at an average realized price of \$1,281 per ounce, \$3 above the London PM fix, for record quarterly revenues of \$129 million
- Completed development of the MCM waste pass in August following which underground mining rates increased to 6,900 tonnes per day at Young-Davidson in September
- Declared initial production at La Yaqui Phase I in early September, ahead of schedule and on budget
- Production of 309,100 ounces of gold through the first three quarters of 2017, putting the Company on track to achieve full year guidance
- The Company remains debt free with cash and cash equivalents and equity securities increasing to approximately \$1.2 billion as at September 30, 2017

## Third Quarter and Year-to-Date 2017 Production

	Three Months Ended September 30, 2017		Nine Months Ended September 30, 2017		Full Year Guidance 2017
	2017	2016	2017	2016	2017
Gold Production (ounces)					
Young-Davidson	55,800	43,629	143,500	125,338	200,000 - 210,000

### Cautionary Note

This News Release includes certain "forward-looking statements". All statements other than statements of historical fact included in this release, including without limitation statements regarding expectations of future development and/or production timelines or other future plans and objectives of Alamos, are forward-looking statements that involve various risks and uncertainties and are based on forecasts of future operational or financial results, estimates of amounts not yet determinable and assumptions of management.

Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "expects" or "does not expect", "is expected", "anticipates" or "does not anticipate", "plans", "estimates" or "intends", or stating that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved) are not statements of historical fact and may be "forward-looking statements." Forward-looking statements are subject to a variety of risks and uncertainties that could cause actual events or results to differ from those reflected in the forward-looking statements.

There can be no assurance that forward-looking statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from Alamos' expectations include, among others, ongoing permitting requirements, the actual results of current exploration activities, conclusions of economic evaluations and changes in project parameters as plans continue to be refined as well as future prices of gold, as well as those factors discussed in the section entitled "Risk Factors" in Alamos' Annual Information Form and other disclosures of "Risk Factors" by Alamos, available on SEDAR and EDGAR. Although Alamos has attempted to identify important factors that could cause actual results to differ materially, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements.
