

Geophysics Identifies Possible Second Gold Zone on Zinger Property

16.10.2017 | [FSCwire](#)

Toronto, Ontario (FSCwire) - VLF (Very Low Frequency) geophysics has identified a potential flat lying to somewhat parallel fold or shear structure that appears to correlate with high values of gold in soils on the West Grid of the PJX Resource's (PJX's) Zinger Property. (See stacked VLF and gold soil profiles at <http://pjxresources.com/stacked-vlf-and-gold-soil-profiles.pdf>)

Highly anomalous gold values in soil range from 100 ppb to over 700 ppb and cover an area approximately 100 metres by over 300 metres long on the West Grid. (see West Grid gold in soil map at <http://pjxresources.com/west-grid-gold-ing-soil.pdf>). The near surface expression of the VLF anomaly appears to parallel higher values of gold in soil (see West Grid VLF anomaly maps at <http://pjxresources.com/west-grid-vlf-anomaly-maps.pdf>). The VLF anomaly also becomes larger at depth. The gold in soil and VLF anomalies are both open along strike.

The somewhat coincident nature of gold in soil with a VLF anomaly on the West grid is very similar to the gold concentrations and geophysics we recently announced on the Zinger Property's East Grid, states Mr. John Keating, President and CEO. The two grids are over 1 kilometre apart. The spatial relationship and orientation of the two VLF and gold anomalies suggests the potential for 2 separate gold zones that are stacked one above the other. (See PJX release October 3, 2017)

Management believes that additional parallel structures with gold potential may occur at depth. The company is reviewing existing airborne geophysics to help define the structures and targets for drilling across the Zinger Property.

The foregoing geological disclosure has been reviewed by John Keating P. Geo. (qualified person for the purpose of National Instrument 43-101 Standards of Disclosure for Mineral Projects). Mr. Keating is the President, Chief Executive Officer and a Director of PJX.

About PJX Resources Inc.

PJX is a mineral exploration company focused on building shareholder value and community opportunity through the exploration and development of mineral resources with a focus on gold. PJX's primary properties are located in the historical mining area of Cranbrook and Kimberley, British Columbia.

Forward-Looking Information

This News Release contains forward-looking statements. Forward looking statements are statements which relate to future events. Forward-looking statements include, but are not limited to, statements with respect to exploration results, the success of exploration activities, mine development prospects, completion of economic assessments, and future gold production. In some cases, you can identify forward-looking statements by terminology such as "may", "should", "expect"

"plans", "anticipates", "believes", "estimates", "predicts", "potential", or "continue" or the negative of these terms or other comparable terminology. These statements are only predictions and involve known and unknown risks, uncertainties and other factors that may cause our actual results, level of activity, performance or achievements to be materially different from any future results, levels of activity, performance, or achievements expressed or implied by these forward-looking-statements.

Although PJX has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
