

Knick Exploration at Quebec Mineral Exploration Association "XPLOR 2017" Convention - Booth #410

17.10.2017 | [The Newswire](#)

Val d'Or, October 17, 2017 - [Knick Exploration Inc.](#) ("Knick") is pleased to report that it will be showcasing its latest geological findings on the company's Trecesson and East-West properties at booth #410 of the Quebec Mineral Exploration Association "Xplor 2017" Convention to be held at the Place Bonaventure in Montreal, Quebec, October 18 and 19.

The latest findings on the Trecesson Property include the 2017 drilling of the Cossette Gold System where 94.4 g/t gold over 6.65 meters down hole were intersected, estimated as a true width of 5.1 meters.

The Trecesson property is located approximately 80 kilometers north of the city of Val D'Or and 10 kilometers northwest of the city of Amos, Quebec, Canada.

The East-West gold property's ongoing research is focused on development of drill targets at depth, under the 250 meter level, as both the nearby Kiena and Camflo Mine orebodies start at a 200 meter depth.

Knick's East-West property is located in the Val d'Or-Malartic mining camp of Quebec, Canada. The property is sandwiched between Osisko Royalties (TSX-T: OR) Marban deposit property to the west and Wesdome Gold Mines (TSX-T: WDO); Kiena Mine complex to the east. It is bound to the south by Agnico Eagle & Yamana Gold's Malartic Goldfields Mine property and recently Agnico Eagle acquired the ground adjacent to the north of the East-West property.

Drill results were previously reported, June 15, 2017.
