

Commander Announces Completion of Drill Program on South Voisey's Bay

23.10.2017 | [Newsfile](#)

Vancouver, British Columbia--(Newsfile Corp. - October 23, 2017) - Commander Resources Ltd. (TSXV: CMD) and project partner [Fjordland Exploration Inc.](#) announce that they have completed the 2017 drill program on their South Voisey's Bay Ni-Cu-Co project located 80 km south of Vale's Voisey's Bay Nickel mine. The original drill plan was expanded from 1000 m to a total of 1469 m in 8 holes. Drilling tested a number of geophysical conductors outlined by UTEM 3 surveys completed in 2014 and 2002. (see News Release dated September 21, 2017). All holes are currently being surveyed by downhole geophysical probes to document existing conductors and test for additional "off hole" conductors. Detailed geological core logging and sampling is ongoing and selected intervals will be submitted for analyses. Assays will be reported upon receipt and compilation.

Subject to permitting the company intends to leave the drill rig on site over the winter in anticipation of additional drilling in 2018.

Upon completion of this program, Fjordland will have increased its ownership from 15% to 35% in this district scale property (294 sq km). An affiliate of High Power Exploration Inc. ("HPX") has an option to fund, on behalf of Fjordland, up to \$7.4 million in exploration expenditures and to make \$290,000 of property payments to Commander. When completed Fjordland would have earned a 100% interest in the South Voisey's Bay project whereupon Fjordland would assign a 65% project interest to HPX. The terms of the transaction were originally announced on August 28, 2017.
