

Bayhorse Ore-Sorter Landed in Portland, Oregon, Enroute to Bayhorse Silver Mine, Easternmost Oregon, USA

24.10.2017 | [Newsfile](#)

Vancouver, British Columbia--(Newsfile Corp. - October 24, 2017) - [Bayhorse Silver Inc.](#) (TSXV: BHS) ("Bayhorse" or the "Company") has been notified that its Steinert KSS100 X-Ray Transmissive "Ore-Sorter" has arrived in Portland, Oregon, USA.

Steinert KSS100 X-Ray Transmissive Ore-Sorter

The last stage of its journey from Germany is by truck from Portland directly to the Bayhorse Silver Mine. A direct route leads 280 miles east along US Interstate 84 to the town of Huntington, OR.

Installation and commissioning of the Ore-Sorter, and training of operating personnel will commence on arrival of the Ore-Sorter at the Mine. Silver-bearing mineralized material from the Legend and Sunshine Zones within the mine has been stockpiled in preparation for immediate testing and operation (see news release BHS2017-19).

Chip, channel, and grab samples from the 50 foot wide mineralized zone have been submitted for assay. Additional material from development of the Legend Zone is being stockpiled.

Bayhorse CEO, Graeme O'Neill, comments, "The Ore-Sorter will employ state of the art sensing and sorting technology to separate mineralized from non-mineralized material and allow the Company to create direct-shipping material for processing by Metals Solutions at Coeur D'Alene, Idaho."

The Company advises it is not basing any decision to produce on a feasibility study of mineral reserves demonstrating economic and technical viability and also advises there is increased uncertainty and specific economic and technical risks of failure associated with any production decision.

This News Release has been prepared on behalf of the [Bayhorse Silver Inc.](#) Board of Directors, which accepts full responsibility for its contents. Dr. Clay Conway, P.Geol., a Qualified Person and Director of Bayhorse has prepared, supervised the preparation of, or approved the technical content of this press release.

On Behalf of the Board,

Graeme O'Neill, President
604-684-3394

[Bayhorse Silver Inc.](#) has earned an 80% interest in the historic Bayhorse Silver Mine, Oregon, USA, through current underground development, and construction of concentrating facilities.

Bayhorse is also earning a 75% interest in the Bridging the Gap Project, consisting of past producing historic

Crown Point, Silver King, Ranger, Wyoming, Curlew, and Blackhawk silver/lead/zinc mines of ASARCO in Idaho's Silver Valley.

The Company has an experienced management and technical team with extensive exploration and mining expertise.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
