

Agrium Announces Sale of Conda Phosphate and North Bend Nitric Acid Operations

07.11.2017 | [Marketwired](#)

ALL AMOUNTS ARE STATED IN U.S.\$

CALGARY, AB--(Marketwired - November 07, 2017) - [Agrium Inc.](#) (TSX: AGU) (NYSE: AGU) announces that it has signed a definitive asset purchase agreement with [Itafos](#), whereby Agrium will sell its Conda, Idaho, phosphate production facility and adjacent phosphate mineral rights for a sale price of approximately \$100-million, including working capital. Agrium has also entered into a definitive asset purchase agreement with Trammo Nitrogen Products, Inc., a wholly-owned subsidiary of Trammo Inc., whereby Agrium will sell its North Bend, Ohio Nitric Acid facility.

The Conda facility and related assets include the entirety of Agrium's superphosphoric acid business ("SPA") in North America and the North Bend facility represents the entirety of Agrium's nitric acid business in the Midwest region. These divestitures are intended to address U.S. regulatory concerns raised with respect to Agrium's merger with PotashCorp and are subject to U.S. Federal Trade Commission's approval.

"The divestment of these assets will help pave the way for our merger with PotashCorp and the excellent line of sight to capture \$500-million in annual synergies. With [Itafos](#) operating the SPA business and Trammo operating the nitric acid business, farmers and industrial customers will be served across the U.S. for many years to come," stated Agrium's President & CEO, Chuck Magro.

As part of the sale of the Conda business, Agrium and [Itafos](#) will enter into long-term strategic supply and off-take agreements as part of the transaction. Under the terms of the supply and off-take agreements, Agrium will supply 100% of the ammonia requirements of Conda Phosphate Operations and purchase 100% of MAP product produced, with pricing formulas for both tied to benchmark phosphate fertilizer prices.

Agrium is expected to record a non-cash impairment of \$178-million, net of tax, (gross of tax \$295-million) associated with the sale of Conda and will retain the historical environmental obligations.

About Agrium

[Agrium Inc.](#) is a major producer and distributor of agricultural products and services in North America, South America, Australia and Egypt through its agricultural retail-distribution and wholesale nutrient businesses. Agrium supplies growers with key products and services such as crop nutrients, crop protection, seed, and agronomic and application services, thereby helping to meet the ever growing global demand for food and fiber. Agrium produces nitrogen, potash and phosphate fertilizers, with a combined wholesale nutrient capacity of over nine million tonnes and with competitive advantages across all product lines. Agrium retail-distribution has an unmatched network of close to 1,500 facilities and over 3,000 crop consultants. We partner with over half a million grower customers globally to help them increase their yields and returns on more than 50 different crops. With a focus on sustainability, the company strives to improve the communities in which it operates through safety, education, environmental improvement and new technologies such as the development of precision agriculture and controlled release nutrient products. Agrium is focused on driving operational excellence across our businesses, pursuing value-enhancing growth opportunities and returning capital to shareholders.
