

# Gastar Exploration Reports Third Quarter 2017 Results

08.11.2017 | [CNW](#)

HOUSTON, Nov. 8, 2017 /CNW/ -- [Gastar Exploration Inc.](#) (NYSE MKT: GST) ("Gastar" or the "Company") today reports its third quarter 2017 results and nine months ended September 30, 2017.

Third quarter 2017 highlights include:

- Average daily production of 6,200 barrels of oil equivalent ("Boe") per day ("Boe/d")
- Production volumes comprised of 72% liquids
- Operational and drilling efficiencies gained momentum

J. Russell Porter, Gastar's President and CEO, commented, "Following an initiative to re-evaluate operating practices in drilling and completion costs, we have made numerous operational refinements that appear to be having a positive impact. Days needed to drill a well from approximately 19 days to 11 days. Further, we have eliminated certain drilling difficulties and improved operating efficiencies. With drilling time now nearly half of what it was previously, we can effectively execute our drilling program and bring drilling with one rig into 2018."

"We have substantially improved our well completion processes and design. Our improved "Gen 3" completion design has improved performance, although it is still too early to accurately draw any firm conclusions. Our first Gen 3 well, the Bagwell 1808 in Oklahoma, commenced flow back on September 21, 2017 and based on early performance appears to be on track with completion operations on September 3, 2017, we have completed 5 wells using the new Gen 3 design, with most of the new wells completed with the previous design, these Gen 3 wells are producing significantly more total fluid volumes in the first 100 days of production, and this trend is increasing."

"We expect that our drilling program to delineate the Meramec and Osage formations across our acreage position will result in drilling a total of 24 gross Meramec and 16 gross Osage wells and have participated in numerous third-party wells across the STACK Play. Success of our program and that of offset operators in the STACK Play, we intend to continue to focus on the STACK Play. We are actively evaluating opportunities to divest our WEHLU asset, a Hunton formation producing unit located primarily in the STACK Play. If successful in divesting WEHLU, we intend to redeploy those proceeds into our core operations in the higher value STACK Play. The sale of our WEHLU assets would provide us with ample liquidity to execute our current one-rig drilling program through 2018."

## Financial Review

Net loss attributable to Gastar's common stockholders for the third quarter of 2017 was \$15.9 million, or a loss of \$0.08 per share, compared to a loss of \$3.8 million, or a loss of \$0.03 per share. Adjusted net loss attributable to common stockholders (non-GAAP), for the third quarter of 2017 was \$11.2 million, or a loss of \$0.05 per share, compared to an adjusted net loss attributable to common stockholders (non-GAAP) of \$0.08 per share, for the third quarter 2016. (See the accompanying reconciliation of the non-GAAP financial measure to GAAP.)

Adjusted earnings before interest, income taxes, depreciation, depletion and amortization ("adjusted EBITDA") (non-GAAP) for the third quarter of 2017 was \$9.8 million, compared to adjusted EBITDA of \$7.2 million for the third quarter of 2016 and \$9.8 million for the second quarter of 2017. (See the accompanying reconciliation of the non-GAAP financial adjusted EBITDA at the end of this news release.)

Total Company revenues were \$15.3 million in the third quarter of 2017, an 18% increase from \$13.0 million in the third quarter of 2016 and \$13.0 million in the second quarter of 2017. The reduction in revenues from the second quarter to the third quarter of 2017 primarily resulted from a decrease in value for outstanding commodity derivative contracts.

Revenues from oil, condensate, natural gas and natural gas liquids ("NGLs"), before the effects of commodity derivative contracts, for the third quarter of 2017, a 26% increase from \$14.5 million in the third quarter of 2016 and a 6% increase from \$17.3 million in the second quarter of 2017. The increase in oil, condensate, natural gas and NGLs revenues primarily resulted from an 18% increase in equivalent production volumes. The increase from second quarter 2017 revenues was due to a 3% increase in equivalent production volumes.

Commodity hedges were in place for approximately 48% of our oil and condensate production, 70% of our natural gas production for the third quarter of 2017. Commodity derivative contracts settled during the period resulted in a \$1.8 million increase in revenues in the third quarter of 2016.

The following table provides a summary of Gastar's overall average commodity prices for the three and nine months ended September 30, 2017.

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2017	2016	2017	2016
Average sales price per unit:				
Oil and condensate per Bbl, including impact of hedging activities <sup>(1)</sup>	\$ 51.77	\$ 47.19	\$ 52.78	\$ 43.85
Oil and condensate per Bbl, excluding impact of hedging activities	\$ 46.56	\$ 42.55	\$ 47.03	\$ 36.41
Natural gas per Mcf, including impact of hedging activities <sup>(1)</sup>	\$ 2.69	\$ 2.76	\$ 2.80	\$ 1.86
Natural gas per Mcf, excluding impact of hedging activities	\$ 2.62	\$ 2.48	\$ 2.71	\$ 1.60
NGLs per Bbl, including impact of hedging activities <sup>(1)</sup>	\$ 22.55	\$ 15.02	\$ 22.02	\$ 10.55
NGLs per Bbl, excluding impact of hedging activities	\$ 20.64	\$ 13.22	\$ 19.87	\$ 8.28
Average sales price per Boe, including impact of hedging activities <sup>(1)</sup>	\$ 34.96	\$ 29.96	\$ 35.65	\$ 22.77
Average sales price per Boe, excluding impact of hedging activities	\$ 31.86	\$ 26.92	\$ 32.19	\$ 18.91

(1) The impact of hedging includes only the gain (loss) on commodity derivative contracts settled during the periods presented.
---

For details on Gastar's current hedging positions, please see our Form 10-Q for the quarter ended September 30, 2017 filed with the U.S. Securities and Exchange Commission ("SEC").

Average daily Mid-Continent production for the third quarter of 2017 was 6,200 Boe/d as compared to 5,800 Boe/d in the third quarter of 2016 and 6,100 Boe/d in the second quarter of 2017.

In the Mid-Continent area, average daily production in the third quarter of 2017 increased 7% compared to the third quarter of 2016 primarily due to increased well completion activity and sequentially decreased 2% primarily due to a temporary suspension of well completion activity while we re-evaluated our operational processes to optimize our well results. Third quarter 2017 Mid-Continent equivalent production consisted of approximately 72% liquids, comprised of 49% oil and 23% NGLs, up 4% from third quarter 2016 production and down 1% from second quarter 2017.

Lease operating expenses ("LOE") per Boe of production were \$10.80 in the third quarter of 2017 versus \$9.59 in the third quarter of 2016 and \$9.20 in the second quarter of 2017, including workover costs. Excluding workover expense, LOE per Boe for the third quarter of 2017 was \$8.80 as compared to \$8.49 per BOE in the third quarter of 2016 and \$8.49 per Boe for the second quarter of 2017.

General and administrative ("G&A") expense was \$4.1 million in the third quarter of 2017 compared to \$3.9 million in the third quarter of 2016 and \$4.6 million in the second quarter of 2017. G&A expense for the third quarter of 2017 included \$1.8 million of non-cash stock-based compensation expense, versus \$810,000 in the third quarter of 2016 and \$1.2 million in the second quarter of 2017.

#### Liquidity and Capital Budget

Gastar's net capital expenditures, excluding property sales proceeds, in the third quarter of 2017 totaled \$37.1 million, comprised of \$26.8 million for drilling, completions and infrastructure costs, \$7.9 million for

unproved acreage extensions, renewals and additions and \$2.4 million of other capitalized costs. Based on the current full-year capital budget of \$129.2 million, our fourth quarter capital expenditures are currently estimated not to exceed \$34.7 million comprised of \$27.3 million for drilling, completion and infrastructure costs, \$4.3 million for lease renewal and extension costs and \$3.2 million of other capitalized costs.

At September 30, 2017, Gastar had approximately \$29.2 million in available cash and cash equivalents and \$412.5 million of principal balance long-term borrowings outstanding.

## Operations Review and Update

The following table provides a summary of Gastar's Mid-Continent production volumes and average commodity prices for the three and nine months ended September 30, 2017 and 2016:

	For the Three Months Ended		For the Nine Months Ended	
	September 30,		September 30,	
	2017	2016	2017	2016
Net Production:				
Oil and condensate (MBbl)	278	242	805	790
Natural gas (MMcf)	962	997	2,746	2,917
NGLs (MBbl)	134	128	379	380
Total net production (MBoe)	572	537	1,642	1,656
Net Daily Production:				
Oil and condensate (MBbl/d)	3.0	2.6	3.0	2.9
Natural gas (MMcf/d)	10.5	10.8	10.1	10.6
NGLs (MBbl/d)	1.5	1.4	1.4	1.4
Total net daily production (MBoe/d)	6.2	5.8	6.0	6.0
Average sales price per unit <sup>(1)</sup> :				
Oil and condensate (per Bbl)	\$ 46.56	\$ 42.56	\$ 47.03	\$ 37.87
Natural gas (per Mcf)	\$ 2.62	\$ 2.48	\$ 2.71	\$ 2.06
NGLs (per Bbl)	\$ 20.64	\$ 13.22	\$ 19.87	\$ 12.79
Average sales price per Boe <sup>(1)</sup>	\$ 31.86	\$ 26.98	\$ 32.19	\$ 24.63

(1) Excludes the impact of hedging activities

During the third quarter of 2017, Gastar commenced flow back on one gross (0.2 net) operated Meramec well and four gross (2.8 net) operated Osage wells. For the first nine months of 2017, Gastar commenced flow back on 14 gross (2.2 net) operated Meramec wells and eight gross (5.8 net) operated Osage wells.

Subsequent to September 30, 2017 through October 31, 2017, Gastar commenced flow back on four gross (3.2 net) operated Osage wells.

## Guidance for Fourth Quarter 2017 and Full-Year 2017

Our guidance for the fourth quarter of and updated full-year 2017 is provided in the table below and represents the Company's best estimate of the range of likely future results. Guidance could be affected by the factors described below in "Forward Looking Statements."

Production	Fourth Quarter 2017	Full-Year 2017
Net average daily (MBoe/d) <sup>(1)</sup>	6.2 &ndash; 7.0	6.0 &ndash; 6.4
Liquids percentage (oil and NGLs)	72% &ndash; 75%	72% &ndash; 75%
<b>Cash Operating Expenses</b>		
Production taxes (% of production revenues)	3.0% &ndash; 3.4%	3.0% &ndash; 3.4%
Direct lease operating (\$/Boe)	\$9.00 &ndash; \$9.75	\$9.75 &ndash; \$10.25
Transportation, treating & gathering (\$/Boe)	\$0.78 &ndash; \$0.86	\$0.75 &ndash; \$0.80
Cash general & administrative (\$/Boe)	\$4.50 &ndash; \$5.00	\$5.00 &ndash; \$5.30

(1)	Based on equivalent of 6 thousand cubic feet (Mcf) of natural gas to one barrel of oil, condensate or NGLs.

### Conference Call

Gastar has scheduled a conference call for 10:00 a.m. Eastern Time (9:00 a.m. Central Time) on Thursday, November 9, 2017. Investors may participate in the call either by phone or audio webcast.

**By Phone:** Dial 1-412-902-0030 at least 10 minutes before the call. A telephone replay will be available through November 16 by dialing 1-201-612-7415 and using the conference ID: 13672652.

**By Webcast:** Visit the Investor Relations page of Gastar's website at [www.gastar.com](http://www.gastar.com) under "Events & Presentations." Please log on a few minutes in advance to register and download any necessary software. A replay will be available shortly after the call.

For more information, please contact Donna Washburn at Dennard-Lascar Associates at 713-529-6600 or e-mail [dwashburn@DennardLascar.com](mailto:dwashburn@DennardLascar.com).

### About Gastar Exploration

[Gastar Exploration Inc.](http://www.gastar.com) is a pure play Mid-Continent independent energy company engaged in the exploration, development and production of oil, condensate, natural gas and natural gas liquids. Gastar's principal business activities include the identification, acquisition and subsequent exploration and development of oil and natural gas properties with an emphasis on unconventional reserves, such as shale resource plays. Gastar holds a concentrated acreage position in what is believed to be the core of the STACK Play, an area of central Oklahoma which is home to multiple oil and natural gas-rich reservoirs including the Meramec, Oswego, Osage, Woodford and Hunton formations. For more information, visit Gastar's website at [www.gastar.com](http://www.gastar.com).

### Forward Looking Statements

This news release includes "forward looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward looking statements give our current expectations, opinion, belief or forecasts of future events and performance. A statement identified by the use of forward looking words including "may," "expects," "projects," "anticipates," "plans," "believes," "estimate," "will," "should," and certain of the other foregoing statements may be deemed forward-looking statements. Although Gastar believes that the expectations reflected in such forward-looking statements are reasonable, these statements involve risks and uncertainties that may cause actual future activities and results to be materially different from those suggested or described in this news release. These include risks inherent in natural gas and oil drilling and production activities, including risks with respect to continued low or further declining prices for natural gas and oil that could result in further downward revisions to the value of proved reserves or otherwise cause Gastar to further delay or suspend planned drilling and completion operations or reduce production levels which would adversely impact cash flow; risks relating to the availability of capital to fund drilling operations that can be adversely affected by adverse drilling results, production declines and continued low or further declining prices for natural gas and oil; risks of fire, explosion, blowouts, pipe failure, casing collapse, unusual or unexpected formation pressures, environmental hazards, and other operating and production risks, which may temporarily or permanently reduce production or cause initial production or test results to not be indicative of future well performance or delay the timing of sales or completion of drilling operations; delays in receipt of drilling permits; risks relating to unexpected adverse developments in the status of properties; risks relating to the absence or delay in receipt of government approvals or third-party consents; risks relating to our ability to integrate acquired assets with ours and to realize the anticipated benefits from such acquisitions; and other risks described in Gastar's Annual Report on Form 10-K and other filings with the SEC, available at the SEC's website at [www.sec.gov](http://www.sec.gov). Our actual sales production rates can vary considerably from tested initial production rates depending upon completion and production techniques and our primary areas of operations are subject to natural steep decline rates. In addition, production information from our recently completed wells completed using our Gen 3 design is preliminary based on limited flow back history and therefore may not be fully indicative of sustained production rates or predictive of ultimate hydrocarbon recoveries. By issuing forward looking statements based on current expectations, opinions, views or beliefs, Gastar has no obligation and, except as required by law, is not undertaking any obligation, to update or revise these statements or provide any other information relating to such statements.

Targeted expectations and guidance for the fourth quarter and full-year of 2017 are based upon the current 2017 planned capital expenditures budget, which may be subject to revision and reevaluation dependent upon future developments, including changes in commodity prices, drilling results, our liquidity position, availability of crews, supplies and production capacity, weather delays and significant changes in drilling costs.

Unless otherwise stated herein, equivalent volumes of production are based upon an energy equivalent ratio of six Mcf of natural gas to each barrel of liquids (oil, condensate and NGLs), which ratio is not reflective of relative value. Our NGLs are sold as part of our wet gas subject to an incremental NGLs pricing formula based upon a percentage of NGLs extracted from our wet gas production. Our reported production volumes reflect incremental post-processing NGLs volumes and residual gas volumes with which we are credited under our sales contracts.

We use both GAAP and certain non-GAAP financial measures to assess performance. Generally, a non-GAAP financial measure is a numerical measure of a company's performance, financial position or cash flows that either excludes or includes amounts that are not normally excluded or included in the most directly comparable measure calculated and presented in accordance with GAAP. Our management believes that these non-GAAP measures provide useful supplemental information to investors in order that they may evaluate our financial performance using the same measures as management. These non-GAAP financial measures should not be considered as a substitute for, or superior to, measures of financial performance prepared in accordance with GAAP. In evaluating these measures, investors should consider that the methodology applied in calculating such measures may differ among companies and analysts. A reconciliation is provided below outlining the differences between these non-GAAP measures and their most directly comparable financial measure calculated in accordance with GAAP.
