The third quarter was another exceptional quarter despite being the wet season. This was our second consecutive quarter where we generated revenues of greater than \$20 million and grew revenue year over year," said Dave Harper, CEO of Geodrill. "By improving market conditions and increased financings, we saw an increase in demand not just from established miners but from juniors. With the underground contract at Kinross well underway, we are now receiving additional tenders for contracts, building momentum. As such, our workshop is busy with additional rig arrivals and ensuring gold-standard training for our operators. We have managed to add 12 rigs to our fleet, a 20% expansion year to date, while maintaining a strong cash position, is testament to the strength of the Company's business model. With this phenomenal growth over the past three quarters, mostly through cash flow, we expect to continue to deliver strong financial results for the remainder of the year and into next year."

Non-IFRS Measures

EBITDA is defined as Earnings before Interest, Taxes, Depreciation and Amortization and is used as a measure of financial performance. The Company believes EBITDA is useful to investors because it is frequently used by securities analysts and other interested parties to evaluate companies in the industry. However, EBITDA is not a measure recognized by IFRS and does not have a standardized meaning prescribed by IFRS. EBITDA should not be viewed in isolation and does not purport to be an alternative to net income or gross profit as an indicator of operating performance or cash flows from operating activities or a measure of liquidity. EBITDA does not have a standardized meaning prescribed by IFRS and therefore may not be comparable to similarly titled measures presented by other publicly traded companies, and EBITDA should not be construed as an alternative to other financial measures determined in accordance with IFRS.

Additionally, EBITDA is not intended to be a measure of free cash flow for management's discretionary use, as it does not include certain cash requirements such as capital expenditures, contractual commitments, interest payments, tax payments and other service requirements. Please see the Company's MD&A for the three and nine month periods ended September 30, 2017 for EBITDA reconciliation.
