

Brazil Minerals, Inc. Updates on New Mining Front & Other News

27.11.2017 | [PR Newswire](#)

PASADENA, California, Nov. 27, 2017 /PRNewswire/ -- [Brazil Minerals Inc.](#) (OTC: BMIX) (the "Company" or "Brazil Minerals") announced today that its majority-owned subsidiary, Jupiter Gold Corporation ("Jupiter Gold"), has launched its own website which is accessible at www.jupitergoldcorp.com. Jupiter Gold owns over 77,000 acres in mineral rights in some of the premier gold districts in Brazil. More details are available by reviewing Jupiter Gold's filings with the Securities and Exchange Commission which are accessible at www.sec.gov or through the public filings page of Jupiter Gold's website.

In other news, on November 24, 2017, Brazil Minerals accepted Ambassador Paul Durand's resignation for health reasons as corporate secretary and director. Ambassador Roger Noriega, a member of the Board of Directors, commented: "Paul is one of the smartest, shrewdest and most respected observers of regional affairs. He will be greatly missed." Marc Fogassa, the Company's chief executive, added: "Paul has a sharp intellect and has always been heartily engaged. He was an exemplary director and will be hard to replace."

In further news, good progress has been made in separating material from a new gravel front for diamond and gold recovery. Samples of such material which were processed last week in the modular recovery plant successfully retrieved both gold and diamonds, and yielded an attractive prospect for mining. The attached photographs taken last week by Peter Goldy, an operations consultant, show one of the Company's mining areas and details of the newly identified gravel.
