

Durango Resources Talking to Stakeholders of Whabouchi Lithium District

05.12.2017 | [The Newswire](#)

Vancouver, December 5, 2017 - [Durango Resources Inc.](#) (TSX.V-DGO), (the "Company" or "Durango") announces that it is reviewing technical data obtained in previous sampling where anomalous lithium values were obtained from surface sampling on its NMX East project located in northern Quebec.

Durango's wholly owned NMX East project adjoins [Nemaska Lithium Inc.](#) (T-NMX) on the eastern perimeter next to Nemaska's Whabouchi deposit and the newly discovered Doris lithium zone. Nemaska Lithium announced December 4th, 2017 that it "confirms first delivery of battery grade lithium hydroxide from Whabouchi mine concentrate."

Durango's geological team previously confirmed a pegmatitic intrusion running parallel to Nemaska Lithium's main zone where testing of lithium and rubidium were anomalous (see September 21, 2016 press release). The Company is in the process of speaking with stakeholders of the immediate area while it conducts its technical review to establish potential drill targets. Additional information will be announced as it becomes available.

About Durango

Durango is a natural resources company engaged in the acquisition and exploration of mineral properties. The Company has a 100% interest in the Mayner's Fortune limestone property and the Golden Triangle properties in northwest British Columbia, the Decouverte and Trove & Windfall gold properties in the Abitibi Region of Quebec, and certain lithium properties near the Whabouchi Mine and the Buckshot graphite property near the Miller Mine in Quebec, the Dianna Lake silver project in northern Saskatchewan, the Whitney Northwest property near Timmins, Ontario.
