#### Recent Company Highlights

- Pure play lithium exposure with clear growth strategy
- Production through the September quarter was 2,135 tonnes of lithium carbonate with consecutive increases month on month as brine concentration and evaporation rates increased
- Production has continued to increase in October, and is on track to achieve budget of 1,220 tonnes for the month. Production has averaged 44 tonnes per day (90% of design) over the past week as brine concentration continued to rise in line with modelling
- The Company reiterates guidance for the full year of 14,000 tonnes of lithium carbonate with production split approximately 45/55 between the first and second halves with record production expected in the December quarter at a production cost of <US\$4,000/tonne
- Sales revenue for the September quarter is US\$23.2 million on total sales of 2,072 tonnes of lithium carbonate
- Average FOB price received up 5% quarter on quarter (QoQ) to US\$11,190/tonne with higher priced contracts reflecting firmer market conditions. Prices are expected to continue to exceed US\$11,000 per tonne FOB in the December FY18 quarter with market conditions remaining tight
- Cash costs (on cost of goods sold basis) were US\$4,987/tonne as a result of lower production volumes in July and August and increased soda ash unit costs caused by the impact of bad weather in June
