

Global Li-Ion Graphite Engages BEGO Technologies to Test Process its Graphite to Graphene

15.12.2017 | [The Newswire](#)

Vancouver, December 15, 2017 - [Global Li-Ion Graphite Corp.](#) ("LION" or, the "Company") (CSE: LION) is pleased to announce that the Company has received graphite samples from its Ambato-Arana Graphite mine in Madagascar and has forwarded the samples to BEGO Technologies to be processed through their proprietary system that processes Graphite to Graphene using a patented membrane/microbe technology.

ABOUT BEGO TECHNOLOGIES

BEGO, an acronym for Bio Electro Chemical Graphene Oxide, is an ecofriendly peer reviewed PCT patent pending process ("Process") that uses Mother Nature's naturally occurring microbes to produce Graphene Oxide from graphite. Graphene Oxide is a precursor to producing Graphene. Commercialization of the Process is being advanced under the direction of Dr. Jin, the Process Co-Inventor in collaboration with experts at Colorado State University, BEGO's priority is to become a low cost high value producer of engineered graphene materials, one of which is dedicated to advancing the next generation graphene based electrode for energy storage.

About the Malagasy Graphite Property

The three mining exploitation licenses that comprise the Project are located in the vicinity of Andasibe in Toamasina Province in Madagascar, 20 km to the southwest of Sheritt's Ambatovy nickel/cobalt laterite open pit mine, and 200km via road from the seaport of Toamasina, Madagascar's main port. The licenses total 4,375 hectares (10,811 acres). Graphite was produced on the licenses for roughly a century from 1910. The production to date has been free digging of lateritic ore and open pit mining, providing low cost exploitation without need for blasting.

Forward-Looking Information:

This press release contains forward-looking statements. The use of any of the words "anticipate", "continue", "estimate", "expect", "may", "will", "project", "should", "believe" and similar expressions are intended to identify forward-looking statements. Although the Company believes that the expectations and assumptions on which the forward-looking statements are based are reasonable, undue reliance should not be placed on the forward-looking statements because the Company can give no assurance that they will prove to be correct. Since forward-looking statements address future events and conditions, by their very nature they involve inherent risks and uncertainties. These statements speak only as of the date of this press release. Actual results could differ materially from those currently anticipated due to a number of factors and risks discussed in the Company's Management's Discussion and Analysis under the Company's profile on www.sedar.com. While the Company may elect to, it does not undertake to update this information at any particular time.
