

USEI Declares Warrant Dividend on Its Common Stock as Part of Its Cannabis Operations and Future

02.01.2018 | [GlobeNewswire](#)

SANTA CLARITA, CA, Jan. 02, 2018 (GLOBE NEWSWIRE) -- USEI CANNABIS INITIATIVES CORP, a wholly owned subsidiary of U.S. ENERGY INITIATIVES CORPORATION, INC. (OTC PINK: USEI) a California based company, poised to capitalize on California's legal cannabis industry focusing on the manufacturing and extraction of oil from cannabis is pleased to announce today that its Board of Directors has declared two (2) dividends in the form of warrants to purchase shares of the Company's common stock; a 1 for 10 or a 10% warrant to shareholders of record on the record date.

The warrants will be issued on pay-date of February 26, 2018 to shareholders of record as of February 16, 2018. Each shareholder of the Company's common stock will receive one warrant for every ten shares owned (10% of their holdings) as of the record date (with the number of warrants rounded up to the nearest whole number). The first warrant will entitle the holder to purchase 10% of their holdings of the Company's common stock equal to the exercise price per share price on March 30, 2018. The second warrant will entitle the holder to purchase 10% of their holdings of the Company's common stock at an exercise price share price on March 30, 2018 plus a 50% premium to that same price (For example $.010 + .005 = .015$). Combined these warrants represent a 20% warrant to the shareholder. (For example, if a shareholder has 1 million shares these warrants allow the shareholder of record to acquire an additional 200,000 shares at these prices). These warrants will be for a 3-year term from the date of issue, non-transferable, with the restricted shares being issued upon exercise. Funds raised because of this warrant will fund the company's likelihood of becoming a reporting issuer with the Securities and Exchange Commission, or SEC and future growth of the company's business model. Further details of this warrant will be disclosed in a future press release.

According to Anthony Miller, CEO, "This is the 3rd dividend that the company has issued to its shareholders in recent years and this event has been planned for a few months. It is management's opinion that the issuance in this case is a beneficial activity for this firm, as it is transitioning to a more profitable business model. This month we begin to actively manufacture oil extractions from cannabis utilizing the MRX extraction technology that we purchased last month. This device is the first in a series of purchases that the company will make to keep pace in the growing demand for cannabis products now that California has become the largest legal marketplace in the world.

"Our goal is to produce a wide range of extracted products; and we plan to actively expand our operation aggressively. We start production on the first day of delivery and these devices will all be operating on a 24/7/365 basis. Revenue produced will allow us to become profitable on the first day of operation; and we believe that there is capital to fund growth. However, it is management's opinion that the warrant announced today will fuel our expansion so that we can continue to grow our opportunity. Management further believes that any additional capital raising should come from those folks who are and have been participating in the growth of this company thus far. Creating toxic dilution of the company's stock to the detriment of those who have been holding strong with us for some time is not acceptable.

"Management, further intends to file with the SEC to finally become a reporting issuer so that the company will have greater transparency and become financially responsible. The cannabis industry requires true and an accurate representation of every dime made, and it is our goal to become fully transparent to the public market in the same manner. In the coming weeks, management will continue to disclose our progress including video of our delivery and extraction operations and post our progress on twitter, Facebook and on the company's websites. Our future is awesome, and it was encouraging to see other companies, in the state of Oregon, that started just like us, with just one device and now up to 7 additional devices in less than three year (3) making millions of dollars annually, and their market is only 1/5 of the California market.

"Finally, management believes that this 20% dividend could represent a significant opportunity to the

shareholders of record because of two reasons 1) management believes that if management executes its business model the share value should become commensurate with revenues produced by our activities and 2) capital provided because these dividends will fuel growth, and both factors could be beneficial to the company.” commented Miller
