

Voltaic Confirms No Material Change

16.01.2018 | [FSCwire](#)

Vancouver, British Columbia (FSCwire) - Voltaic Minerals Corp. (TSXV: VLT, OTC: VTCCF, FSE: 2P61) (the "Company" or "Voltaic") at the request of the TSX Venture Exchange, wishes to confirm that its management is not aware of any corporate development or undisclosed material change to the Company or its operations that would account for the recent increase in market activity.

About Voltaic Minerals Corp.

[Voltaic Minerals Corp.](#) is a Vancouver-based Lithium exploration company, which owns 100% of the Green Energy Lithium Project that encompasses 4,160 acres of Bureau of Land Management (BLM) claims and is in Grand County, 15 km west of the city of Moab, Utah. Lithium and other minerals occur at the property in an over-saturated brine (40% minerals, 60% water) discovered during historic oil exploration when drill wells intercepted Clastic Bed #14 of the Paradox formation.

ON BEHALF OF THE BOARD

VOLTAIC MINERALS CORP.

Forward-Looking Statements

This news release contains forward-looking information which is subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ from those projected in the forward-looking statements. Forward looking statements in this release include that we will receive a detailed report on the Lithium extraction process so that we can determine whether further involvement will be cost effective; that we could agree to definitive agreements and that all phases of our signed agreements will be implemented. These forward-looking statements are subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those projected in the forward-looking information. Risks that could change or prevent these statements from coming to fruition include that the Company and Lithium Selective Technologies may not agree on the final agreement terms, aspects or all of the process development may not be successful, the process may not be cost effective, the Company may not raise sufficient funds to carry out our plans, changing costs for mining and processing; increased capital costs; the timing and content of upcoming work programs; geological interpretations based on current data that may change with more detailed information or testing; potential process methods and mineral recoveries assumption based on limited test work and by comparison to what are considered

analogous deposits that with further test work may not be comparable; the availability of labour, equipment and markets for the products produced; and despite the current expected viability of the project, that the minerals on our property cannot be economically mined, or that the required permits to build and operate the envisaged mine cannot be obtained. The forward-looking information contained herein is given as of the date hereof and the Company assumes no responsibility to update or revise such information to reflect new events or circumstances, except as required by law.
