

National Oilwell Varco Announces Changes in Reporting Segments; Expects Fourth Quarter 2017 Results to Be In-Line with Guidance, Excluding Charges

19.01.2018 | [Business Wire](#)

[National Oilwell Varco Inc.](#) (NYSE: NOV) today announced it combined its Rig Systems and Rig Aftermarket reporting segments into a single segment called Rig Technologies during the fourth quarter of 2017. The restructuring better aligns operations with the current and anticipated market environments, reduces administrative burden, and eliminates reported intercompany transactions between Rig Technologies' capital equipment and aftermarket operations. The Company will report fourth quarter and full-year results in the new format on February 5, 2018.

The table below conforms prior period Rig Systems and Rig Aftermarket segment results to the new Rig Technologies segment presentation:

The Company anticipates it will recognize between \$120 and \$140 million in pre-tax restructuring charges, including facility closures, severance and inventory write-downs, and other charges (collectively "other items") during the fourth quarter of 2017.

Excluding the impact of other items, the Company expects consolidated results for the fourth quarter of 2017 to be at or above prior expectations. The Company anticipates Rig Technologies will exceed prior guidance,

Wellbore Technologies will be in-line with expectations, and Completion and Production Solutions will fall short of guidance. The shortfall in Completion and Production Solutions is due primarily to engineering challenges and delivery delays associated with a new product introduction in its Subsea Flexible Pipe business and softer than anticipated orders in its Process and Flow Technologies business.
