

# Durango Resources Inc. Highlights 2017 Milestones in Preparation for 2018

19.01.2018 | [The Newswire](#)

Vancouver, Jan. 19, 2018 - [Durango Resources Inc.](#) (TSX.V-DGO) (Frankfurt-86A1) (OTC Grey-ATOXF), (the "Company" or "Durango") announces that over the past year, Durango has achieved numerous milestones which further position the Company for discovery in the coming year.

## 2017 Milestones

- - Negotiated an option agreement on the Trove gold property with [BonTerra Resources Inc.](#) ("BonTerra") which resulted to date in a cash inflow of \$750,000 with no dilution to shareholders. Durango still owns 100,000 of these shares and may obtain a further \$350,000 in cash, and a further 1,500,000 shares of BonTerra if the option is fully exercised pursuant to the option agreement.
- - Durango's favourable grades of 99.9% CaCO<sub>2</sub> at Mayner's Fortune limestone project in northern B.C. received an exemption from the registration process of the Canadian Food Inspection Agency (CFIA) for the use of limestone as a fertilizer. A consultant was hired to take structural measurements and evaluate targets for a recommended drill program to determine the size and quality of the limestone potential.
- - Staked a 2,000ha property adjacent to GT Gold in the Golden Triangle of B.C. who announced a new high-grade discovery in July 2017. Durango went on to further obtain fractional claim blocks positioning it even closer to the discovery area. Durango sent an exploration team up to the properties in late fall determine access, and to complete surface mapping. Some samples were obtained and are pending results.
- - Applied and obtained permits to dewater the historical pit at the Dianna Lake Silver project in Saskatchewan, which was followed up with exploration and sampling resulting in assays of 6kg/t silver, 4.21% copper and 736 g/t cobalt. The Company staked additional ground surrounding the original land position to ensure full coverage.
- - Staked and purchased additional Windfall Lake gold properties in Quebec expanding Durango's position to over 8,600 hectares in the Urban Barry greenstone belt. The high priority blocks of claims were chosen and underwent a till sampling program in late November and results are pending.
- - Obtained fractional claims adjacent to [Garibaldi Resources Corp.](#) and [Metallis Resources Inc.](#) in Golden Triangle of northern B.C. The one claim runs north to south of the length of the Garibaldi boundary on the eastern border, and another is adjacent to the east of Metallis. Due to weather conditions, Durango was not able to visit these properties in 2017.
- - The continued partnership program with INRS (Institut national de la recherche scientifique) defined nine geophysical exploration target areas for the Decouverte gold property in northern Quebec. Durango then hired a consultant to interpret all relevant data on the Decouverte and to build a geological model and drill program for the property as announced on January 16th, 2018.
- - Durango reviewed the technical data from previous sampling on its wholly owned NMX East lithium property which adjoins the eastern perimeter of [Nemaska Lithium Inc.](#) The Company hired a consultant to prepare a NI 43-101 report and is in discussions with land users regarding potential test drilling and timing.

Marcy Kiesman, President and CEO of Durango stated, "During 2018 Durango plans to continue to position

for discovery while it aims to work on projects that will positively impact shareholder value. Durango has set strategic goals for 2018 to increase market awareness and expand its shareholder base and to drill strategic exploration targets. I would like to thank our shareholders for their continued support and look forward to an exciting year ahead."

#### About Durango

Durango is a natural resources company engaged in the acquisition and exploration of mineral properties. The Company has a 100% interest in the Mayner's Fortune limestone property and the Golden Triangle properties in northwest British Columbia, the Decouverte and Trove & Windfall gold properties in Quebec, lithium properties near the Whabouchi Mine, the Buckshot graphite property near the Miller Mine in Quebec, the Dianna Lake silver project in northern Saskatchewan and the Whitney Northwest gold property near Timmins, Ontario.
