About Orla Mining Ltd.

Orla Mining owns two advanced stage open pit, heap leach style oxide gold projects in Panama and Mexico. Camino Rojo is an advanced gold and silver project covering over 200,000 hectares in Zacatecas State, Central Mexico. The project is 100% owned and has historical oxide reserves along with historical sulphide resources (which Goldcorp retains a back-in right on the sulphides). The Company believes it has exploration potential for additional oxide and sulphide mineral resources. Access and infrastructure are excellent with a paved highway and powerline nearby. A NI 43-101 Technical Report dated January 24, 2018, on Camino Rojo is available on SEDAR. The 100% owned Cerro Quema project in Panama includes a near-term gold production scenario and exploration upside. Cerro Quema's 14,800 Ha concession boasts paved road access, a supportive local population and private land ownership. The Cerro Quema project is currently in the last stage of the permitting process for a proposed open pit mine and gold heap leach operation. Please refer to the Cerro Quema Project - Pre-feasibility Study on the La Pava and Quemita Oxide Gold Deposits dated August 22, 2014, which is available on SEDAR.
