The interconnections between IoT, Cryptocurrency and Blockchain are becoming more apparent. Blockchain protocols provide assurances a request for access is legitimate.

There are currently 130 million established households in North America and a healthy seasonally adjusted annualized rate of 1.3 million housing starts. In addition, offices, hotels and coffee shops are also potential markets for Smart Devices. If only one or two devices are installed in new homes and retro-fitted into current homes undergoing renovations, there will be a healthy demand for these products.
