

Pershimex Resources Corporation intersects 0.41 g/t Au over 165.30 metres on their Courville project

21.02.2018 | [Marketwired](#)

ROUYN-NORANDA, QUEBEC--(Marketwired - Feb 21, 2018) - [Pershimex Resources Corp.](#) (formerly Khalkos Exploration inc.) (« Pershimex » or the « Company ») (TSX VENTURE:PRO) is pleased to announce the first results of its 2017 drilling campaign on its Courville property. All holes with known results intersected mineralization comprising extensive, low-grade zones associated with the Thibodeau intrusion as well as high-grade internal-zones (refer to table). The 2017 drilling campaign has doubled the mineralized zone, attaining a strike length over more than 800 m (refer to table).

Results confirm the 2005 [Pershimco Resources Inc.](#), geological model: low gold grades over extensive widths, also integrating higher grade zones. One of the significant intervals obtained during the 2017 campaign yields 0.41 g/t Au over 165.30m including 7.31 g/t Au over 2.80m. This significant mineralized interval of the known Rolartic showing is more than 300m southeast of the 14,000 tonne bulk sample realised in 2005 by [Pershimco Resources Inc.](#), which recovered 790 ounces of gold from a pit having a maximum depth of 5m. This type of result confirms that the Rolartic showing sector is host to gold mineralization similar to that observed in the Malartic sector.

Hole	Zone	From	To	Grade over width	Metal Factor
CRV-17-005	Thibodeau intrusion	65.00	105.20	0.50g/t Au over 40.20m	20.10
	Internal	73.15	75.00	3.78g/t Au over 1.85m	
	Internal	98.00	99.00	2.76g/t Au over 1.00m	
CRV-17-006	Thibodeau intrusion	34.30	143.10	0.37g/t Au over 108.80m	40.36
	Internal	136.05	137.00	3.04g/t Au over 0.95m	
CRV-17-007	Thibodeau intrusion	19.65	105.40	0.39g/t Au over 85.75m	33.44
	Internal	30.20	31.20	2.87g/t Au over 1.00m	
CRV-17-008	Thibodeau intrusion	83.70	223.50	0.40g/t Au over 139.80m	56.48
	Internal	142.50	143.50	3.95g/t Au over 1.00m	
	Internal	172.45	173.45	3.93g/t Au over 1.00m	
	Internal	198.00	206.15	2.32g/t Au over 8.15m	
	including and including	201.00 205.15	202.00 206.15	9.43g/t Au over 1.00m 6.32g/t Au over 1.00m	
CRV-17-009	Thibodeau intrusion	45.95	126.70	0.46g/t Au over 80.75m	36.74
	Internal	65.50	70.50	4.69g/t Au over 5.00m	
	including	67.00	68.00	15.25g/t Au over 1.00m	
	and including	68.00	69.00	5.94g/t Au over 1.00m	
CRV-17-010	Thibodeau intrusion	85.65	250.95	0.41g/t Au over 165.30m	67.28
	Internal	134.80	135.30	2.24g/t Au over 0.50m	
	Internal	177.20	180.00	7.31g/t Au over 2.80m	
	including	178.00	179.00	19.20g/t Au over 1.00m	

Robert Gagnon, President and Chief Executive Officer stated: « This drill campaign is the largest in the

history of the company. We are really pleased with the results of this first drill campaign on the Courville project. They confirm the pertinence of the acquisition of this high-development potential project. Already, we have confirmed the Rolartic showing over 800m. In the short term, we expect to complete the required financing to continue our work and thereby increase the mineralized zone at depth and in the southwest and northwest extensions. We will soon be releasing new results obtained during our 2017 drill campaign. »

Following an analytical quality assurance and control program, blank samples and certified reference materials were added to drill core samples before being shipped and analyzed by ALS Chemex of Val-d'Or, Quebec, following the pyro-analysis method. This press release was prepared by Robert Gagnon, Professional Geologist, President of Pershimex Resources, and Qualified Person under NI-43-101.

Pershimex Resources Corp.- Short overview

- Holds more than 800 claims in the Abitibi-Témiscamingue
- Partner with Dundee Precious Metals on the Malartic property
- Partner with Chalice Gold Mines on the Forsan property
- New directors on its board of directors, recognized for their success in the mining field via the presence of the Bureau family.
