Reasons and Benefits of the Arrangement

Benefits to Mountain Province Shareholders

- Adds Kennady's 100% owned diamondiferous bodies, which contain indicated resources of 13.62 million carats and inferred resources of 5.02 million carats
- Kelvin kimberlite – indicated resources of 13.62 million carats at an average grade of 1.60 carats per tonne and average value of US\$63 per carat as estimated by bulk samples completed in 2015 and 201
- Faraday kimberlites – inferred resources of 5.02 million carats at an average grade of 1.54 carats per tonne and average value of US\$98 per carat as estimated by a 2017 bulk sampl
- Size and grade of Kelvin and Faraday add to total number of carats owned by Mountain Province for future productio
- Addition of these two bodies opens up new mine planning opportunities that could deliver optimized revenue realization and operating cost control

- Upside to grow resources at both Kelvin and Faraday and develop potential resources at the Doyle and MZ kimberlites
- Adds 67,164 hectares of highly prospective and 100%-owned exploration ground strategically surrounding the Gahcho Kué mine
- Benefit of complementary assets held by Mountain Province and Kennady
 - Kennady controls the bulk of the prospective kimberlite belt and Mountain Province owns 49% of the belt's operating mine, creating opportunities to add Kennady assets to Gahcho Kué joint venture (subject to agreement with Mountain Province's joint venture partner, De Beers) or advance exploration, building 100%-owned value that can be combined with Gahcho Kué joint venture at a later date
 - Potential to significantly reduce pre-production capital expenditures, transportation costs and operating expenses on a combined basis
- Timing is right
 - Lead time to develop and permit Kennady assets – potential to partially displacing lower-grade Tuzo ore scheduled to be mined from 2023-2025 with higher-grade ore from Kelvin or Faraday should Kennady assets be integrated into Gahcho Kué joint venture
 - Will fully control Kennady's 2018 drill program – 2017 summer drilling program highlighted key opportunities to grow the current Faraday resource and 2018 plan is in place to explore other key value enhancing targets

Benefits to Kennady Shareholders

- All-share deal allows Kennady's current shareholders to retain ongoing exposure to Kennady's assets as well as gain exposure to Mountain Province's 49% interest in the operating Gahcho Kué mine
- Gain access to Mountain Province's exploration and development expertise and financial strength to enhance the advancement of Kennady's North Project, generating enhanced exploration upside for the combined assets
- Immediate premium on the Kennady Shares
- Enhanced liquidity and improved capital markets profile
- Access to Mountain Province's expertise – potential to mitigate risks relating to any future commercialization of Kennady's mineral properties, including risk of Kennady becoming a stranded asset
