

Honey Badger Exploration Initiates Drilling Program at its Thunder Bay Silver Camp

16.03.2018 | [GlobeNewswire](#)

TORONTO, March 16, 2018 (GLOBE NEWSWIRE) -- [Honey Badger Exploration Inc.](#) (TSX-V:TUF) ("Honey Badger" or the "Company") announces that it has mobilized a drill to commence a 1,500 m drilling program at its Thunder Bay Polymetallic Silver Camp. The drilling program is anticipated to start tomorrow.

Earlier this year, the Company completed a systematic exploration program. Combining field measurements, historic data and airborne geophysics (electromagnetic and airborne magnetic), Honey Badger identified key structural controls on the polymetallic silver mineralization of its Beaver Silver Property. Scientific literature indicates that most of the high-grade polymetallic silver veins in the area are located at the junction of faults.

The selection of drill targets in the vicinity of the historic Beaver Mine (average historic grade of 0.25% silver) on the Beaver Silver Property was made possible through the integration of available geoscientific data and the construction of a 3D model of the structures known to host polymetallic silver mineralization. These intersections will be tested in the upcoming drill program.

Honey Badger's current exploration program at the Thunder Bay Silver Camp also included the collection of rock samples from the Silver Mountain and Mink properties. These underwent spectral and geochemical analysis to examine alterations and were sent for assaying. Results are expected in the coming weeks.

About Honey Badger's Thunder Bay Silver Camp

Honey Badger has secured a large land package in the historic Thunder Bay Silver District that totals 55.6 sq. km. The Thunder Bay Silver Camp includes three properties: the Beaver Silver Property, the Mink Property and the Silver Mountain Property. All three are prospective for multi-element silver mineralization similar to that of the Cobalt District. All properties are ideally located close to roads, power lines, infrastructure, and skilled labour force.

The geological and mining history of the Thunder Bay Silver district indicate a high potential for new discoveries in the region. The region remains under-explored or un-explored with modern exploration techniques and the Company considers that there is a good potential to discover additional silver mineralization, including nickel and cobalt, at its newly acquired Thunder Bay Silver Camp.

About Honey Badger Exploration Inc.

Honey Badger Exploration is a gold and base-metals exploration company headquartered in Toronto, Ontario, Canada with properties in Quebec and Ontario. The Company's common shares trade on the TSX Venture Exchange under the symbol "TUF".
