About Bankers

Bankers is a natural resource company focused on the acquisition, exploration and development of cobalt and copper mineral properties in the DRC to world-class Canadian standards. As battery production for EV's surges, demand for cobalt will probably exceed supply for many years. According to a recent report by Transparency Market Research, global sales of lithium-ion batteries are expected to reach US\$70B by 2024, for a compound growth rate of 11.6% over the years beginning in 2016. Bankers holds rights to 26 separate mineral concessions strategically located in the southern DRC Copperbelt and having a total area of more than 391 km². Bankers has the intention to acquire interests in additional concessions. All concessions were obtained as either new grants or through reputable DRC partners and have clean title with no government involvement, making Bankers one of the few, and perhaps only, junior public mining company in the DRC to have 26 concessions capable of being currently explored. Bankers has an experienced operations team operating in the southern Cobalt-Copperbelt of the DRC. Bankers believes it is the front runner in advancing cobalt and copper exploration by a junior mining company in the DRC.
