Oil, natural gas, and natural gas liquids revenues for the three months ended March 31, 2018 increased 236% compared to the three months ended March 31, 2017. This was due to a 156% increase in sales

volumes combined with a 30% improvement in average realized sales price per BOE.

Unit operating costs generally continue to benefit from larger volumes of production from horizontal wells turned to sales during the last twelve months. Production taxes for the three months ended March 31, 2017 were favorably impacted by an adjustment to the Company's assumed ad valorem tax rate.

The Company's 2018 first quarter net income totaled \$65.8 million, or \$0.27 per diluted share, compared to a net income of \$19.9 million, or \$0.10 per diluted share, in the year ago quarter. Adjusted EBITDA in the first quarter of 2018 was \$115.7 million as compared to \$32.5 million in the year ago quarter.

The Company accrued deferred tax expense of \$5.8 million during the first quarter of 2018 as compared to no expense in the same period of 2017. This is primarily a result of expectations for positive three-year cumulative taxable income through 2018. The Company expects an effective tax rate of approximately 8% through the remainder of the year.

#### Credit Agreement

On April 2, 2018 the Company entered into a new amended and restated credit agreement for its revolving credit facility. Among other provisions, the borrowing base under the credit agreement was increased to \$550 million with aggregate elected commitments of \$450 million. The Company currently has no amounts drawn on the facility.

## Reconciliation of Non-GAAP Financial Measures

We define adjusted EBITDA, a non-GAAP financial measure, as net income adjusted to exclude the impact of the items set forth in the table below. We exclude those items because they can vary substantially from company to company within our industry depending upon accounting methods and book values of assets, capital structures, and the method by which the assets were acquired. We believe that adjusted EBITDA is widely used in our industry as a measure of operating performance and may also be used by investors to measure our ability to meet debt covenant requirements. The following table presents a reconciliation of adjusted EBITDA to net income, its nearest GAAP measure:
