

Canada Strategic Metals and Matamec intersect 3.08 g/t Au over 15 m and 5.31 g/t Au over 4.5 m on the Sakami Property

31.05.2018 | [GlobeNewswire](#)

- 3.08 g/t Au over 15 m
- 3.25 g/t Au over 4.5 m
- Extending at depth mineralization by 30 meters
- Sedar filling of the Sakami NI 43-101 Report

MONTREAL, May 31, 2018 - [Canada Strategic Metals Inc.](#) ("Canada Strategic Metals" or "the Company") (TSX-V:CJC) (FSE:YXEN) (OTC-BB:CJCFF) and [Matamec Explorations Inc.](#) (TSX-V:MAT) (OTC-QX:MHREF) are pleased to announce the results from the first five (5) holes of the 2018 winter drilling campaign on the Sakami project. A total of 7,295 m of drilling was completed in 21 drill holes (PT-18-107 to PT-18-127, see location map below). The campaign successfully extended the known mineralized area to the west and at depth. These holes included some infill drilling.

The first five holes intersected Zone 25 and increased the size of the project's mineralized area. Hole PT-18-111 extends Zone 25 at depth to the west side by approximately 30 m from the deepest elevation on section 2+00W with a grade and width similar to the above interception in hole PT-17-102. This result supports the potential for higher grade mineralization at depth. The deepest intersection from previous drilling was in hole PT-15-89 and PT-15-90 on section 0+50W. Highlights of the drill results are presented in the table below.

Table of mineralized intersections from recent 2018 winter drill program

Hole #	From (m)	To (m)
PT-18-107	250.50	253.50
Including	253.50	264.00
PT-18-107	264.00	289.50
PT-18-107	289.50	285.00
PT-18-108	285.00	304.50
Including	304.50	309.00
PT-18-108	309.00	319.50
PT-18-109A	319.50	295.50
Including	295.50	300.00
Including	300.00	304.50
Including	304.50	385.50
PT-18-111	385.50	399.00
PT-18-111	399.00	415.50
PT-18-111	415.50	445.50
PT-18-111	445.50	115.50
PT-18-119	115.50	124.50
PT-18-119	124.50	142.50
PT-18-119	142.50	163.50
PT-18-119	163.50	

* Length along the core. True thickness ranges from 70% to 95% of the drilled length.

The winter 2018 drilling program was designed based on the recommendations presented in the NI 43-101 technical report prepared by SGS Canada Inc. for Canada Strategic and Matamec with a date of issue of November 24, 2017 . The report is available on Sedar's web site at www.sedar.com. The program was managed by Consul-Teck Exploration of Val-d'Or, Quebec who supervised the program and logged and sampled the core.

Consul-Teck Exploration implemented QA/QC procedures to ensure best practices in sampling and analysis of the core samples. The drill core was logged and then split, with one-half sent for assay and the other retained in the core box as a witness sample. Duplicates, standards and blanks were inserted regularly into the sample stream.

The samples were delivered, in secure tagged bags, directly to the analytical facility for analysis, in this case the ALS Minerals laboratory facility in Val-d'Or, Quebec. The samples are weighed and identified prior to sample preparation. All samples are analyzed by fire assay with AA finish on a 30g sample (0.005-10 ppm Au), with a gravimetric finish for assays over 10 ppm Au.

Jean-Sebastien Lavallée (OGQ #773), geologist, shareholder, Executive Chairman and Exploration Manager of the Company and a Qualified Person under NI 43-101, has reviewed and approved the technical content of this release.

About Canada Strategic Metals

Canada Strategic Metals is an emerging company focused on the exploration and development of a number of projects covering over 57,084 hectares in Quebec. With broad management experience in green technology and junior resource exploration and development, Canada Strategic Metals is well positioned to aggressively advance this promising property portfolio for its shareholders.

For more information on the Company, please visit www.csmetals.ca.
