Orford Mining Announces Agreement to Acquire Condor Precious Metals

12.06.2018 | CNW

TORONTO, June 11, 2018 /CNW/ - Orford Mining Corp. ("Orford") (TSX-V: ORM) is pleased to announce that today it entered into a definitive agreement to acquire Condor Precious Metals Inc. (Condor), a private company with a cash an marketable securities balance of \$1.25 million, including \$663,122 in cash. Condor also holds two royalties on previous exploration property located in Colombia (Condor no longer owns any exploration properties).

Under the terms of the proposed transaction, Condor Shareholders will receive 0.073 shares of Orford for each Condor along with a 1/4 share purchase warrant for every Orford share issued at closing. The warrants will be exercisable at \$0 Orford share for a two-year period. A total of up to 5,043,096 Orford common shares (worth approximately \$1.1 million, the \$0.22 closing price of the Orford shares on June 7, 2018) and 1,260,774 Orford warrants will be issued under this to

David Christie, President and CEO of Orford, commented, "This transaction gives Orford a significant hard dollar cash I that will be used to fund exploration at our Carolina gold projects and for general corporate purposes. The acquisition o allows Orford to add hard dollars to its balance sheet in a cost-effective manner. We're excited to welcome the Condor shareholders to the Orford story as we continue to explore our very promising projects in Northern Quebec and the Car

Orford has entered lock up agreements for approximately 49% of the outstanding shares of Condor. Condor will hold a shareholder vote to approve the transaction (requiring the approval of 2/3 of the shares voting at the Condor special me shareholders being called to consider the transaction). The Condor Board of Directors has unanimously recommended approval of the transaction. Other conditions include the approval of the TSX Venture Exchange. Subject to the satisfact these conditions, it is expected that the transaction will close in July 2018.

Pursuant to Multilateral Instrument 61?101? Protection of Minority Security Holders in Special Transactions ("MI 61?10 amalgamation to be undertaken to implement the transaction constitutes a "related party transaction", as Dundee Resculinited and its subsidiaries, holder of approximately 25% of the Orford shares (undiluted) and approximately 27% of the shares, is a "related party" of each of Orford and Condor. This amalgamation is exempt from the valuation and minority shareholder approval requirements of MI 61?101 by virtue of the exemptions contained in section 5.5(a) and 5.7(1)(a) of 61?101, since neither the fair market value of the subject matter of, nor the fair market value of the consideration for, the amalgamation, exceeds 25% of Orford's market capitalization. The amalgamation is also exempt from formal valuation requirements by virtue of the exemption contained in section 5.5(b) since Orford is not listed on the specified markets. I amalgamation will constitute a "Reviewable Transaction" under TSXV Policy 5.3 since it involves "Non-Arm's Length Pahowever, the transaction will not be considered a "Fundamental Acquisition", or involve the creation of a new insider, or change to management, or the acquisition of any new properties or other change or business. No finder's fee is payable connection with the transaction.

About the Carolina Gold Properties

Orford has entered into an option agreement with Carolina Gold Resources Inc. to earn a 70% interest in both the Jones-Keystone and Landrum-Faulkner Properties located respectively in North Carolina and South Carolina in the sou US. The properties are located in the Carolina Gold Belt, home to Oceana Gold's producing Haile Mine (3.7 Moz resou g/t Au)⁵, and the past-producing Ridgeway Mine.

The Jones-Keystone and Landrum-Faulkner Properties occur at or near the same regional geological contact as the Ha Ridgeway mines. At Jones-Keystone, mineralization is exposed at surface and historical drilling has yielded multiple drintercepts in the 1 to 3 g/t range including an interval of 1.56 g/t Au over 54m core length including 3.01 g/t Au over 28m length in historical hole JK-10-006, and an interval of 1.27 g/t Au over 104m core length including 3.03 g/t Au over 14m length in historical hole JK-11-017^{1,2}.

About the Qigavik Property

The Qiqavik Property covers the 40-km long Qiqavik Break, part of the Cape Smith Belt event which is of Paleoproteros (1.8-1.9 billion years). This geologic era is marked by its significant metal endowment as illustrated by the important go

20.11.2025 Seite 1/3

that occur worldwide related to geological events of Paleoproterozoic age. These include the Flin Flon-Snow Lake Belt Ashanti Gold Fields of West Africa, the Tapajos-Parima Belt of Brazil, and the Tanami Region in Australia. The Cape S is also home to Glencore's world class Raglan Mine.

Early-stage exploration work completed to date on the Qiqavik Property shows that high-grade gold and copper occurred associated with secondary splay structures located along the district-scale Qiqavik Break Shear Zone which extends the km length of the Qiqavik Property. Geological data indicate that gold mineralization at Qiqavik is structurally controlled associated with porphyry intrusions in places.
