About Beauce Gold Fields

BGF is a wholly owned subsidiary of HPQ Silicon that is in the process of "Spinning Out" its gold assets into BGF, a new public junior gold company, subject to approval by TSX-V.

The Beauce Gold Fields project is a unique, historically prolific gold property located in the municipality of Saint-Simon-les-Mines in the Beauce region of Southern Quebec. Comprising of a block of 152 claims 100% owned by HPQ, the project area hosts a six kilometre long unconsolidated gold-bearing sedimentary unit (a lower saprolite and an upper brown diamictite). The gold in saprolite indicates a close proximity to a bedrock source of gold, providing possible further exploration discoveries. The property was also hosts numerous historical gold mines that were active from 1860s to the 1960s (see HPQ SEDAR-filed report).

The early exercise period will commence June 18, 2018, and expire July 17, 2018. The incentive warrants will be subject to a four-month hold period from the date of issuance.
