"Hod Maden was discovered only three years ago and has since made remarkable progress towards production, at a pace that few projects in the mining industry could match and Sandstorm is pleased to be partnered with one of the best Turkish mining operators," says Sandstorm President & CEO Nolan Watson. "The PFS outlines total production of more than 2.6 million gold equivalent ounces over an 11 year mine life and with the by-product credits from copper, we expect gold to be produced at a low all-in sustaining cost."
