PHOENIX, July 17, 2018 -- Uptick Newswire today announced [Aben Resources Ltd.](#) CEO, Jim Pettit's interview on Uptick Newswire's Stock Day podcast.

"Since your last visit to our show the Company was trading around \$0.09, it is now trading between \$0.18 and \$0.19 and trading good volume. Can you tell me about the results of drilling last year?" asked Jolly.

"We drilled about 2,500 meters last year," said Pettit. "It turned out to be nine holes. We hit a pretty significant structure, 21 gram gold, 28 gram silver and 3% copper. The whole mineralized zone is well over 300 meters, so it is a very broad-based zone that has very high grade cores."

"The Company's most recent project is the Forrest Kerr Project in a region in British Columbia called the Golden Triangle," said Jolly. "Where they began an 18-hole project."
