## About Peregrine

Peregrine is a TSX-listed diamond exploration and development company with its primary assets located in northern Canada. Peregrine's core asset is its 100%-owned, 317,213-hectare Chidliak Project, located 120 kilometres from Iqaluit, the capital of Nunavut, where 74 kimberlites have been discovered to date, with eight being potentially economic.

A Preliminary Economic Assessment ("PEA"), dated effective May 23, 2018, details the Chidliak 2018 PEA and is available in a National Instrument 43-101 ("NI 43-101") technical report titled "Updated Preliminary Economic Assessment NI 43-101 Technical Report Chidliak Project, Nunavut, Canada", available on SEDAR and the Company's website.

The Chidliak 2018 PEA is preliminary in nature and includes Inferred Mineral Resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. There is no certainty that the PEA will be realized.

Peregrine also controls the 8,494-hectare Lac de Gras Project in the Northwest Territories, located approximately 27 kilometres from the Diavik Diamond Mine. For information on data verification, exploration information, and resource estimation procedures see the NI 43-101 technical report entitled "Peregrine Diamonds Ltd. Lac de Gras Project, Northwest Territories, Canada NI 43-101 Technical Report" dated effective July 15, 2014, which is available on SEDAR and the Company's website.
