

Golden Predator Launches Kaska Kayeh Video; Provides Exploration Update

06.09.2018 | [GlobeNewswire](#)

VANCOUVER, Sept. 06, 2018 - Golden Predator Mining Corp. (TSX.V: GPY; OTCQX: NTGSF) (the "Company" or "Golden Predator") is extremely pleased to announce the launch of *Kaska Kayeh*, filmed at its 3 Aces Project in Canada's Yukon. Golden Predator, an innovative exploration company, created the video to document the way the Kaska Nation and Golden Predator work together in a cooperative and mutually beneficial manner which respects First Nation rights and culture. Golden Predator also provides an update of 2018 exploration activities at the Company's 3 Aces Project and the Brewery Creek Project in Canada's Yukon.

The *Kaska Kayeh* video was produced by Brian Ladue, a Kaska citizen, and can be viewed at: <https://youtu.be/iEAnkoq6qOc>. Golden Predator has worked with the Kaska Nation since 2010 and expanded this relationship to include the 3 Aces Project in 2015.

"It's always a great pleasure to work with my Elders and land stewards, especially on important cultural and land related projects. It's also very encouraging to see a company such as Golden Predator taking the lead on making efforts to change the status quo when it comes to how industry conducts themselves with First Nations," said Brian Ladue, President of Northern Wild Productions. "Film is such a great medium to express cultural perspectives and is a powerful method to effectively reach many people in a positive and productive way. It truly is the evolution of storytelling in a modern world."

"Golden Predator is committed to operating in an open and cooperative nature and to have a positive impact on the communities where we work," said Janet Lee-Sheriff, CEO of Golden Predator. "The *Kaska Kayeh* video and our on-going Elders in Residence Program are only two examples of the multi-faceted approach we take to working closely and creatively with the community along with training, sound environmental practices, employment, service and supply contracts and a community development program."

Exploration Update

The 1,000 m diamond drilling metallurgical testing program at its 100% owned, past producing Brewery Creek Project is now complete. Samples have been received by SGS Lakefield where testing will be conducted to establish amenability to vat leaching in order to enhance project economics. The metallurgical studies are expected to be completed by year end. In addition, ~800 m of exploration drilling, within and outside of existing resource areas was completed with results anticipated in the next several weeks. The exploration program was designed to expand the current limits of known mineralization.

The 2,500 m diamond drill program currently underway at the high-grade gold, 100% owned Sprogge Area of the Company's 3 Aces Project is designed to target the primary structural control along 2 km of strike at varying depths ranging from near surface to ~200 m below surface. Drilling at Sprogge is expected to be complete within the next week with initial results anticipated in October 2018.

The Company has commenced its 2018 bulk sample program designed to reconcile tight spaced drill results, metal distribution modelling, geological interpretation and physical rock characteristics. Bulk sampling of approximately 6,000 metric tonnes is anticipated to be completed in approximately one month. Interim reporting will occur in Q4/18 with final results reported in 2019. With approximately 10% of the sampling completed, two new gold-bearing veins have been identified that were not intersected in previous drilling.

The bulk sample will be processed solely using conventional gravity recovery methods (crushing, grinding,

sluicing and shaker tables) and will continue to provide valuable geological, engineering and metallurgical information while effectively demonstrating that gravity processing is sufficient to obtain high gold recoveries without the use of chemicals or elaborate equipment.

As a result of continued target identification and current bulk sampling, a reverse circulation (RC) drill program commenced on Aug 16, 2018 in the Central Core Area at the 3 Aces Project, it is expected to continue for up to 60 days. The objective for the continuing RC drill program will be to test new targets and new veins discovered during the bulk sampling program. In addition, diamond drilling will begin in the next few weeks in the Central Core Area designed to establish continuity between the original high-grade discoveries at the Ace of Hearts and the Spades areas; a distance of more than 1 km.

Background Information

Northern Wild Productions

Northern Wild Productions is a Yukon based video production company, owned and operated by Brian Ladue. Brian Ladue, a former Chief of the Ross River Dena Council and member of the Kaska Nation is a seasoned and experienced Producer, Director, Cinematographer and Film Editor. In the last 10 years Brian has produced a number of film projects, the majority of these projects being "in-house" traditional knowledge films for the Kaska people. These projects included making documentary films using the stories and legends of the Kaska, while documenting the language and traditional knowledge in a format that will endure for years to come.

Ultimately, Brian hopes to extend his expertise in film making to capture and re-tell some of the greatest northern stories that need to be told. With a vast understanding and knowledge of today's most modern production technologies, Northern Wild Productions thrives to produce the highest of quality productions.

Janet Lee-Sheriff, Chief Executive Officer

Ms. Lee-Sheriff brings 25 years of public, government and private sector experience to the role of CEO having served in senior officer-level positions with several public companies. Previously, Ms. Lee-Sheriff managed Cabinet Policy and Intergovernmental Affairs for the Conservative, Liberal and NDP governments of the Yukon, developed the Yukon Economic Forums and delivered gold conferences for GATA in Dawson City, Yukon, Washington, DC and London, England. She founded the Yukon Mines Legacy Foundation and the Yukon Gold Mining Alliance.

Ms. Lee-Sheriff has a long history of pro-actively working with the Yukon First Nations. As founding director of the Yukon Mines Training Association, she secured \$10 million in federal funding for aboriginal mine training. She has successfully negotiated and implemented many socio-economic and exploration agreements between the Company and several Yukon First Nations. Ms. Lee-Sheriff is a recipient of the Queen's Jubilee Commemorative Medal awarded for outstanding achievements by Canadians and is a graduate of Queen's University.

Elders-in-Residence Program

In May 2018, Golden Predator launched the Kaska Nation Elders-in-Residence Program, a first of its kind for the exploration and mining sectors. The Elders-in-Residence Program, at the 3 Aces Project in southeast Yukon, works directly with Ross River Dena Council and Liard First Nation Elders to support learning and understanding, promote cultural awareness and share wisdom/and teachings as part of the exploration process. The Company is proud to pioneer this innovative and unique initiative and views this on of the tools to involve the community in the exploration program while mutually benefitting from shared information and working together.
