

# Ubique Minerals Lists on the CSE and Commences 2018 Drilling Program

12.09.2018 | [FSCwire](#)

Toronto, Ontario (FSCwire) - [Ubique Minerals Ltd.](#) (CSE: UBX) ("Ubique or the "Company") announces that it has listed its common shares on the Canadian Securities Exchange ("CSE"). Trading has commenced under the symbol UBX. The public listing by Ubique will allow investors to follow the affairs of the company more closely and in particular the progress of exploration for zinc at its Daniel's Harbour Property in Newfoundland.

"This is an exciting time for Ubique, and I would remind holders of Ubique A Warrants that they have 10 days from the date of this announcement to exercise their warrants after which these warrants will expire," said Gerald Harper, CEO of Ubique.

The Company has commenced its 2018 drilling program, and recently mobilised a diamond drill to the property. The program follows up drilling as recommended in the NI 43-101 report by Stuckless (2017), copies of which are available on the Ubique website at [www.ubiqueminerals.com](http://www.ubiqueminerals.com).

The initial 2017 diamond drilling program intersected zinc mineralization in six of the nine holes drilled in the Ubique claim area, including the P Zone. Ubique hole UM-4-17 had an exceptionally high grade interval averaging 13.6% zinc over 12.2 metres, with individual 0.8 metre assay intervals as high as 35% zinc. All holes were drilled vertically and are believed to have intersected approximately true thicknesses of mineralization. Depths of intersections ranged between 50 and 65 metres below surface. A complete summary of the results of the drill holes is given below.

Six of the 2017 drill holes were drilled to test an interpreted easterly trend of mineralization extending east from the mine area of the P Zone. These were all successful in intersecting zinc values suggestive of a continuous deposit. This trend has been named the P-East Zone and will be one of the targets for the 2018 drill program. Other 2018 targets include the P-North Zone and the Muddy Pond Zone where historic, wide-spaced diamond drilling intersected the same favourable host environment as the P Zone. Three of the 2017 drill holes were targeted at an interpreted trend of mineralization extending north from the mined out P Zone. They all intersected altered, brecciated rocks, typical of those hosting zinc mineralization elsewhere in the Daniel's Harbour mine area, but none of these three holes revealed zinc values suggestive of a deposit.

Prior to the 2018 diamond drilling program commencing, company personnel have been searching for, locating and surveying positions of many old diamond drill holes. These are being plotted up, so as to integrate their information and reported results into the overall interpretation of the mineralized trends. Personnel are also extending the geochemical soil survey which was initiated last year in the Tilt Pond area of the Eastern Mineral Licenses and which revealed two anomalous areas.

#### Ubique 2017 Drilling Program Results

| Drill Hole # | Easting | Northing | Dip | Interval | Zinc %     | Zone targeted |
|--------------|---------|----------|-----|----------|------------|---------------|
| UM-1-17      | 9169    | 3175     | -90 |          | Trace only | P-North       |
| UM-2-17      | 9162    | 3176     | -90 |          | Trace only | P-North       |
| UM-3-17      | 9180    | 3180     | -90 |          | Trace only | P-North       |
| UM-4-17      | 9260    | 2908     | -90 | 12.2m    | 13.60      | P-East        |
| UM-5-17      | 9344    | 2922     | -90 | 0.65m    | 14.06      | P-East        |
| UM-6-17      | 9300    | 2894     | -90 | 11.5m    | 5.06       | P-East        |
|              |         | Or       |     | 4.5m     | 10.1       | P-East        |
| UM-7-17      | 9348    | 2915     | -90 | 1.7m     | 12.79      | P-East        |
| UM-8-17      | 9350    | 2906     | -90 | 1.62m    | 5.1        | P-East        |
|              |         | Or       |     | 0.6m     | 10.8       | P-East        |
| UM-9-17      | 9307    | 2905     | -90 | 4.2m     | 5.37       | P-East        |

All 2017 program drill holes were drilled vertically and all are interpreted to have intersected approximately true widths of mineralization.

mineralized zone. The website contains plans and sections showing the recent drilling and photographs of some of the mineralized core.

Ubique owns 109 claims located in the Daniel's Harbour area covering 27 sq kms, in two blocks. The P Zone is Ubique completed its 2017 drilling program, the highlight of which was a true width intersection of 13.6% Zinc over 12.2m including 17.43% Zinc over 8.6m. The zinc mineralization intersected in the 2017 drilling program is a very pale colour sphalerite, and characteristic of a low-iron Mississippi-Valley-Type carbonate rock geological environment analogous to deposits in north America. Approximately 7,000,000 tonnes averaging 7.8% zinc have been mined from the Daniels Harbour adjacent to Ubique's claims, and which was milled on site and shipped as a very high grade concentrate from nearby water port facilities to a custom zinc smelter. (2000) Mineral Commodities of Newfoundland and Labrador: Lead; Government of Newfoundland and Labrador, Geological Survey, Mineral Commodities Series Number 1, 12 pages*) information is available on Ubique's website [www.ubiqueminerals.com](http://www.ubiqueminerals.com)

Dr. Gerald Harper, P.Geo.(Ont), the CEO of Ubique, is the qualified person as defined by NI 43-101 responsible for the data presented herein and has reviewed and approved this release.

About Ubique Minerals Limited.

[Ubique Minerals Ltd.](http://www.ubiqueminerals.com) (CSE:UBQ) is a zinc exploration company listed on the CSE. It has focused on exploration of its Daniel's Harbour zinc property in Newfoundland, and has been funded for the last two years by private equity in Greenbank Capital Inc (CSE:GBC and OTCMKTS:GRNBF and FRA:2TL). Ubique has an experienced management group with a record of multiple discoveries of deposits worldwide, and owns an extensive and exclusive database of historic exploration from the Daniel's Harbour area. For more information on Ubique please contact Gerald Harper, CEO, at (416) 291-1111 by email [gharper@ubiquezinc.com](mailto:gharper@ubiquezinc.com) or see [www.ubiqueminerals.com](http://www.ubiqueminerals.com)

Forward-Looking Information: This press release may include forward-looking information within the meaning of Canadian securities legislation, concerning the business and trading in the common stock of [Ubique Minerals Ltd.](http://www.ubiqueminerals.com), the raising of capital and the future development of the business. The forward-looking information is based on certain key expectations and assumptions made by the company's management. Although the company believes that the expectations and assumptions which such forward-looking information is based are reasonable, undue reliance should not be placed on the forward-looking information because Ubique can give no assurance that they will prove to be correct. These forward-looking statements are as of the date of this press release and Ubique disclaims any intent or obligation to update publicly any forward-looking information whether as a result of new information, future events or results or otherwise, other than as required by applicable securities legislation.

Neither the Canadian Securities Exchange nor its Regulation Services Provider accepts responsibility for the adequacy or accuracy of this release.
