

Drilling at Cerro Cascarón to Commence Next Week

26.09.2018 | [The Newswire](#)

Vancouver, British Columbia / The Newswire / September 26, 2018 - [Harvest Gold Corp.](#) (TSX.V: HVG) (the "Company") is pleased to announce the receipt of a field report from its Joint Venture partner and Project Operator, [Evrin Resources Corp.](#) ("Evrin") (TSX.V: EVM), regarding final preparations for its Phase 1 diamond drilling exploration program at the high-grade Cerro Cascarón gold-silver project in Mexico.

As of September 24, Evrin's crew have organised the local helpers, mule support and access to all drill pads, and have established a core-cutting facility and camp at Cerro Cascarón. Recent rains have provided an ample supply of water for drilling, which will save time and money during drilling. The drill contract is now being finalized and mobilization from Hermosillo to the project is expected to start September 29, with drilling to commence next week.

Harvest Gold's President and CEO Rick Mark states, "I am very pleased to let our shareholders know that drilling is planned to begin next week. It has been a long wait, but everything is finally in order and we are ready to go. And, with the new money in the treasury, we can move more aggressively on the Property this fall. Upon commencement of drilling, we will be providing both Harvest and Evrin shareholders and the commodities market in general, an in depth look at the property, our initial targets and our drilling strategy. Evrin's audience is substantial and we look forward to updating them on Cerro Cascarón's progress.

The first phase plan for diamond drilling consists of 14 diamond drill holes comprising 3,000 metres to 3,500 metres in five of eight target areas on the property which have been defined by rock channel, grab and soil samples. Planned drill hole depths range from 100 metres to 300 metres.

About Harvest Gold Corporation

Harvest Gold is a mineral exploration company presently advancing its Cerro Cascarón high grade gold/silver project in Chihuahua State, Mexico, where an initial 3,000 metre drill program is planned for 2018. Harvest can earn up to 80% of the Cerro Cascarón project through its Joint Venture with Evrin Resources (TSXV: EVM).

Harvest Gold's board of directors and management team are experienced in successful exploration and have collective geological and financing experience exceeding 200 years.

ON BEHALF OF THE BOARD OF DIRECTORS:

Rick Mark,
President and CEO
[Harvest Gold Corp.](#)
