

Hemisphere Energy Announces Record Production Growth and Participation in Upcoming Investor Conference

26.09.2018 | [CNW](#)

TSX-V: HME

VANCOUVER, Sept. 26, 2018 - [Hemisphere Energy Corp.](#) (TSX-V: HME) ("Hemisphere" or the "Company") is pleased to provide an update on field operations and corporate participation in an upcoming conference.

Based on field estimates, corporate production has averaged approximately 1510 boe/d (97% oil) during the week of September 15th-21st. This production number does not include the final two new wells from the 11 well summer drill program, which are scheduled to come on production by the end of September.

Hemisphere also expects its Upper Mannville G pool facility expansion to be complete by the end of September, with start-up of the new SKUD (inclined free water knockout) and oil treater planned for the first week of October. Management anticipates additional growth in production rates from both of its Atlee Buffalo pools through the fourth quarter as wells continue to clean up and the facilities are optimized following their recent expansion work.

Don Simmons, President and CEO of Hemisphere, will be representing the Company at its exhibitor booth at the Schaeffler Energy Conference to be held on Saturday September 29, 2018, at the TELUS Convention Centre in Calgary, Alberta.

Please see our website at www.hemisphereenergy.ca for the company's updated corporate presentation.

About Hemisphere Energy Corporation

[Hemisphere Energy Corp.](#) is a producing oil and gas company focused on the development of low risk conventional oil and gas with minimal capital exposure by drilling known pools of oil and optimizing waterflood projects. Hemisphere plans continued production, reserves, and cash flow by drilling existing projects and executing strategic acquisitions. Hemisphere trades on the TSX Venture Exchange as a Tier 1 issuer under the symbol "HME".

Forward-looking Statements

Certain statements included in this news release constitute forward-looking statements or forward-looking information (collectively, "forward-looking statements") within the meaning of applicable securities legislation. Forward-looking statements are typically identified by words such as "anticipate", "continue", "estimate", "expect", "forecast", "may", "will", "project", "contemplate", "plan", "intend", "should", "believe", "outlook", "potential", "target" and similar words suggesting future events or future performance. In particular, but without limiting the generality of the foregoing, this news release includes forward-looking statements regarding management's anticipation for additional growth in production rates from both its Atlee Buffalo pools through the fourth quarter as wells continue to clean up and the facilities are optimized, Hemisphere's plans for continued production, reserves, and cash flow by drilling existing projects and executing strategic acquisitions.

Forward-looking statements are based on a number of material factors, expectations, or assumptions of Hemisphere which have been used to develop such statements but which may prove to be incorrect. Although Hemisphere believes that the expectations reflected in such forward-looking statements are reasonable, undue reliance should not be placed on forward-looking statements because Hemisphere can give no assurance that such expectations will prove to be correct. In addition to other factors and assumptions which may be identified herein, assumptions have been made regarding, among other things: that Hemisphere will continue to conduct its operations in a manner consistent with past operations; results from drilling and development activities consistent with past operations; the quality of the reservoirs in which Hemisphere operates and continued performance.

existing wells; the continued and timely development of infrastructure in areas of new production; the accuracy of the Hemisphere's reserve volumes; certain commodity price and other cost assumptions; continued availability of debt and financing and cash flow to fund Hemisphere's current and future plans and expenditures; the impact of increasing competition; the general stability of the economic and political environment in which Hemisphere operates; the general continuance of industry conditions; the timely receipt of any required regulatory approvals; the ability of Hemisphere to obtain qualified equipment and services in a timely and cost efficient manner; drilling results; the ability of the operator of the projects in which Hemisphere has an interest in to operate the field in a safe, efficient and effective manner; the ability of Hemisphere to obtain financing on acceptable terms; field production rates and decline rates; the ability to replace and expand oil and natural gas reserves through acquisition, development and exploration; the timing and cost of pipeline, storage and facility construction, expansion and the ability of Hemisphere to secure adequate product transportation; future commodity prices; currency, interest and interest rates; regulatory framework regarding royalties, taxes and environmental matters in the jurisdictions in which Hemisphere operates; and the ability of Hemisphere to successfully market its oil and natural gas products.

The forward-looking statements included in this news release are not guarantees of future performance and should not be relied upon. Such statements, including the assumptions made in respect thereof, involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements including, without limitation: changes in commodity prices; changes in the demand for or supply of Hemisphere's products, the early stage of development of some of the evaluated areas and zones; unanticipated operational results or production declines; changes in tax or environmental laws, royalty rates or other regulatory matters; changes in development plans of Hemisphere or by third party operators of Hemisphere's properties, increased debt levels or debt covenants; requirements; inaccurate estimation of Hemisphere's oil and gas reserve volumes; limited, unfavourable or a lack of access to capital markets; increased costs; a lack of adequate insurance coverage; the impact of competitors; and certain other risks detailed from time to time in Hemisphere's public disclosure documents, (including, without limitation, those risks identified in this news release and in Hemisphere's Annual Information Form).

The forward-looking statements contained in this news release speak only as of the date of this news release, and Hemisphere does not assume any obligation to publicly update or revise any of the included forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required by applicable securities laws.

Oil and Gas Advisories

A barrel of oil equivalent ("boe") may be misleading, particularly if used in isolation. A boe conversion ratio of 6 Mcf:1 Boe is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalent to the wellhead. In addition, given that the value ratio based on the current price of crude oil as compared to natural gas is significantly different from the energy equivalency of 6:1, utilizing a conversion on a 6:1 basis may be misleading as an indicator of value.

Definitions and Abbreviations

boe/d barrel of oil equivalent per day

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this news release.
