

Initial Prospecting at Pacton's Friendly Creek in the Egina Area of the Pilbara Identifies Gold Nuggets

15.10.2018 | [CNW](#)

VANCOUVER, Oct. 15, 2018 - [Pacton Gold Inc.](#) (TSXV: PAC, OTC: PACXF) (the "Company" or "Pacton") is pleased to announce that an advanced team of reconnaissance prospectors collected gold nuggets from six locations on Pacton's Friendly Creek tenements. Pacton recently expanded its prospective exploration area in and around the Friendly Creek project with the planned acquisition of the Golden Palms tenement (E 47/3810) (Pacton News: Sept 27, 2018), and the Hong Kong tenement (E 47/3556), (Pacton News: Oct 11, 2018), (Figure 1).

An advance team of reconnaissance prospectors collected gold nuggets from six locations on Pacton's Friendly Creek tenements prior to the commencement of organized geological mapping and exploration (Pacton News: Sept 21, 2018). The gold nuggets were located in weathered material overlying a package of unclassified Mesoarchean ultramafic rocks and komatiitic basalt that extends along the Friendly Creek tenements for approximately ten km (Figure 2). The origin of the gold nuggets, which show various morphological shapes, has not yet been determined. Subject to confirmation by detailed geological mapping, it is assumed that the material has not been transported, and that the nuggets represent eluvial material that has been liberated from the underlying bedrock. This tentative interpretation is supported by the reports of historical gold workings from the same geological unit throughout the Friendly Creek tenements, and throughout Pacton's adjacent Hong Kong tenement. Massive areas of the prospective geological formation also underlie the Golden Palms tenement, which is largely unexplored.

About Pacton Gold

Pacton Gold (PAC: TSXV; PACXF: US) is a well-financed Canadian junior with key strategic partners focused on the exploration and development of conglomerate-hosted gold properties located in the district-scale Pilbara gold rush in Western Australia. The Company recently raised approximately \$5.5 million, currently controls the third largest conglomerate-hosted gold property portfolio totaling in excess of 2,500 km², and continues to aggressively review additional accretive acquisitions.
