

# Spruce Ridge Resources Begins Drilling the Crawford Property

15.11.2018 | [ACCESS Newswire](#)

WELLINGTON COUNTY, November 15, 2018 - [Spruce Ridge Resources Ltd.](#) (TSXV: SHL) ("SpruceRidge") is pleased to announce that drilling has begun on their optioned property in Crawford Township, Ontario. The diamond drill program will be approximately 2,000 metres.

The first drill hole is planned to be 600 metres deep and will test the strongest portion of a 3,000metre long magnetic anomaly within an interpreted ultramafic and mafic intrusive complex covering an area of approximately 3.5 by 2.0 kilometres, estimated from recently completed airborne geophysical surveys. An airborne gravity survey using the Falcon system was recently carried out by Noble Minerals Inc., the Optionor of the Crawford property. A helicopter-borne electromagnetic and magnetic survey also covered the area.

The presence of ultramafic and mafic intrusive rocks is confirmed by limited diamond drilling performed in the 1960s. Ultramafic-mafic complexes are favourable sites for nickel ± copper ± cobalt ± platinum-group elements (PGEs). The primary target of the upcoming drill program is a magnetic anomaly peak and closely associated 1400-metre long EM conductor. An artificial intelligence (AI) assessment of combined geological and geophysical data confirmed the favourable interpretation of the ultramafic-mafic intrusive complex as a target for nickel mineralization, as well as highlighting VMS-type targets elsewhere on the Crawford property (see news release of July 16th, 2018).

The Crawford property is crossed from south to north by provincial highway 655. The target area is 42 kilometres by road from the centre of Timmins, and it is 17 kilometres north of the Kidd Creek zinc-copper-silver mine, which has been in continuous operation for 50 years, producing in excess of 100 million tonnes of ore, making it one of the largest VMS mines in Canada and in the world. The Timmins mining camp has produced more gold than any other mining district in Canada, over 70 million ounces to date. Gold mining commenced in 1909 and continues today, with new discoveries being made in response to new exploration programs. The target area for the present drilling program is within 1,500 metres of highway 655.

Despite being so close to a major mining camp, the Crawford property has seen relatively little historical exploration. It is in the Abitibi Clay Belt; outcrops are essentially non-existent, making conventional prospecting impossible. The clay and till cover is up to 60 metres thick, and the clay interfered with early electromagnetic survey systems, creating false anomalies and distorting bedrock conductive responses so that anomalies often appeared in the wrong place. Modern electromagnetic methods have largely overcome the clay effects and enable definition of drill targets under thick overburden. Magnetic and gravity surveys are also unaffected by clay and have played a major role in defining the current exploration targets.

## About Spruce Ridge Resources

Spruce Ridge Resources has a 100% interest in the Great Burnt Copper/Gold Property in Central Newfoundland which covers a series of copper ± gold rich VMS deposits including the Great Burnt Main Deposit. Potential high-grade starter pit identified with 237,000 tonnes at 2.51% copper (undiluted) at the Great Burnt Zone. Management considers that an open pit with processing at a custom facility should have low capex requirements. It also has a 50% joint venture with [Americas Silver Corp.](#) on property that contains tailings with low grade gold and silver from the Drumlummon Mine in Montana and an agreement with Anaconda Mining whereby Anaconda acquired from Spruce Ridge the Viking and Kramer gold properties in northwestern Newfoundland. The Viking property is host to the Thor Deposit which has combined Indicated and Inferred resources totaling 83,000 ounces of gold at an average grade of 2.09 and 1.79 g/t Au respectively at a 1.0 g/t Au cutoff.

**CAUTIONARY STATEMENT:** This News Release includes certain "forward-looking statements" which are not comprised of historical facts. Forward-looking statements include estimates and statements that describe the Company's future plans, objectives or goals, including words to the effect that the Company or management expects a stated condition or result to occur. Forward-looking statements may be identified by such terms as "believes", "anticipates", "expects", "estimates", "may", "could", "would", "will", or "plan". Since forward-looking statements are based on assumptions and address future events and conditions, by their very nature they involve inherent risks and uncertainties. Although these statements are based on information currently available to the Company, the Company provides no assurance that actual results will meet management's expectations. Risks, uncertainties and other factors involved with forward-looking information could cause actual events, results, performance, prospects and opportunities to differ materially from those expressed or implied by such forward-looking information. Forward looking information in this news release includes, but is not limited to, the Company's objectives, goals or future plans, statements regarding exploration results, potential mineralization, the estimation of mineral resources, exploration and mine development plans, timing of the commencement of operations and estimates of market conditions. Factors that could cause actual results to differ materially from such forward-looking information include, but are not limited to: failure to identify mineral resources, failure to convert estimated mineral resources to reserves, the inability to complete a feasibility study which recommends a production decision, the preliminary nature of metallurgical test results, delays in obtaining or failures to obtain required governmental, environmental or other project approvals, political risks, inability to fulfill the duty to accommodate First Nations and other indigenous peoples, uncertainties relating to the availability and costs of financing needed in the future, changes in equity markets, inflation, changes in exchange rates, fluctuations in commodity prices, delays in the development of projects, capital and operating costs varying significantly from estimates and the other risks involved in the mineral exploration and development industry, and those risks set out in the Company's public documents filed on SEDAR. Although the Company believes that the assumptions and factors used in preparing the forward-looking information in this news release are reasonable, undue reliance should not be placed on such information, which only applies as of the date of this news release, and no assurance can be given that such events will occur in the disclosed time frames or at all. The Company disclaims any intention or obligation to update or revise any forward-looking information, whether as a result of new information, future events or otherwise, other than as required by law.
