#### Going Concern and Extension of Debt Maturity Date

The Company's only source of revenue, the 70% owned Mineral Ridge mine, suspended mining in November 2017 as the Company had mined all of its economical mineral reserves based on gold pricing and heap leach recovery parameters. Remaining reserves are determined uneconomical to continue mining with the existing processing infrastructure due to higher associated strip ratios and heap leach recoveries and will require higher gold prices or mill processing to be considered economical. Management expects to generate limited revenues from residual but diminishing gold recoveries from the leach pads approximately through Q1 of 2019. As a result, the Company's revenues from operations have been and continue to be adversely affected, and cash flow from operations will soon be insufficient to support the Company.

In addition, the principal amount of \$6.0 million of the Company's senior secured debt matured on August 13, 2018. Since the Company was not in a position to repay the \$6 million debt at that date, it requested and received from its lender extensions of the maturity date of its debt agreement, the most recent of which extended the maturity date to December 19, 2018, subject to certain conditions. For more information, see the Company's press release dated November 8, 2018.

In light of this situation, the Company does not expect that it will be able to generate sufficient cash flows from its operations to continue as a going concern in the near future. The Company will need to raise additional capital to support its operations and to settle its long-term debt. The Company is currently evaluating various business alternatives, which include a potential sale transaction, a business combination, or refinancing its long-term debt and raising the required capital to support its operations and for the construction of a new processing facility at the Mineral Ridge mine

#### Outlook

The Company's main focus is to identify potential sale transactions, business combinations, or opportunities to raise sufficient financing to improve its financial position and to re-finance its senior secured debt obligations and to allow it to proceed with the construction of a new processing facility at Mineral Ridge with a view to process heap leach materials and additional open-pit mineral reserves.

#### NON-IFRS MEASURES

The discussion of financial results in this press release includes reference to Adjusted net earnings, Adjusted EBITDA, Total cash cost per ounce of gold sold which are non-IFRS measures. The Company provides these measures as additional information regarding the Company's financial results and performance. Please refer to the Company's MD&A for the three and nine months periods ended September 30, 2018 for definitions of these terms and a reconciliation of these measures to reported International Financial

Reporting Standards (‘IFRS’) results.

#### About Scorpio Gold Corporation

Scorpio Gold holds a 70% interest in the producing Mineral Ridge gold mining operation located in Esmeralda County, Nevada with joint venture partner Elevon, LLC (30%). Mineral Ridge is a conventional open pit mining and heap leach operation. Mining at Mineral Ridge was suspended in November 2017; however, the Company continues to generate limited revenues from residual but diminishing recoveries from the leach pads. Scorpio Gold also holds a 100% interest in the advanced exploration-stage Goldwedge property in Manhattan, Nevada with a fully permitted underground mine and 400 ton per day mill facility. The Goldwedge mill facility has been placed on a care and maintenance basis and can be restarted immediately when needed.

Scorpio Gold’s Chairman, Peter J. Hawley, P.Geo., is a Qualified Person as defined in National Instrument 43-101 and has reviewed and approved the content of this release.
