

- Halfway: Is located over 500 m east of Windjammer South. Drill hole MWJ11-43 intersected 3.25 m @ 8.87 g/t Au including 2.30 m @ 11.74 g/t Au at 410.75 m down hole depth near the BIF contact. There are no other drill holes close to this area.
- Westaway: Is located on over 1.50 kms of BIF contact between South West and "55". Drill hole MN-96-178 intersected 5.80 g/t Au including 1.50 m @ 10.42 g/t Au at a down hole depth of 146.70 m. Drill hole MN-96-178 intersected 5.64 g/t Au including 1.10 m @ 11.16 g/t Au at a down hole depth of 268.50 m. Drill hole MN-97-184 intersected 3.50 g/t Au including 3.20 m @ 6.14 g/t Au. The intercepts occur up to 200 m south of the BIF contact as sedimentary quartz-pyrite veining.
- Western: The Western area is located approximately 2.00 km west of the "55" deposit. Drill hole MA03-14 returned 4.26 g/t Au including 2.00 m @ 9.90 g/t Au at a down hole depth of 213.60 m. Hole MA03-15 intersected 1.50 m @ 3.07 g/t Au including 0.60 m @ 15.93 g/t Au at a depth of 147.60 m.
- Windjammer South Deeps: Hole WJ88-40 was drilled to a depth of over 1,000 m, below the Windjammer South siltstone vein system currently the subject of the pending resource update. The drill hole intersected a number of vein structures and distal to the BIF contact intersecting 2.00 m @ 3.29 g/t Au including 1.00 m @ 5.80 g/t Au at 835.00 m and 1.24 g/t Au including 1.00 m @ 3.02 g/t Au at a depth of 945.60 m.
- Dymont 3: The Dymont 3 area is located 1.0 km west of the "55" deposit. Drill hole MA06-33 intersected 1.50 m @ 3.07 g/t Au including 0.50 m @ 7.20 g/t Au at 242.45 m down hole depth.

Intercepts are calculated using a 2.0 g/t Au cut-off unless noted (\*), a maximum of 2m internal dilution and no top cap applied. All intercepts are reported as drill widths and estimated to be 65% to 100% of true width.

#### QA/QC Procedures

All core drilling conducted by Moneta is oriented. Half sawn drill core is sent to ALS Canada Inc. for drying and crushing to -2 mm, with a 1.00 kg split pulverized to -75 µm (200#). A 50 g charge is Fire Assayed and analyzed using a AAS finish for Gold. Samples above 10.00 g/t Au are analyzed by Fire Assay with a gravimetric finish and selected samples with visible gold or high-grade mineralization are assayed by Metallic Screen Fire Assay on a 1.00 kg sample. Moneta inserts independent certified reference material and blanks with the samples, and assays routine pulp repeats and coarse reject sample duplicates with the samples, as well as completing third-party check assays at Activation Laboratories Ltd. Gary O'Connor, FAusIMM is a qualified person under NI 43-101 and has reviewed and approved the contents of this press release.

#### About Moneta

The Company holds a 100% interest in 5 core gold projects strategically located along the Destor-Porcupine Fault Zone in the Timmins Gold Camp with over 85 million ounces of past gold production. The projects consist of the Golden Highway, North Tisdale, Nighthawk Lake, Kayorum and Denton projects. The Golden Highway Project covers 12 kilometres of prospective ultramafic/mafic volcanic/sedimentary rocks along the DPFZ hosting a NI 43-101 indicated resource estimate of 1,091,000 ounces (31.1 Mt at 1.09 g/t Au) and 3,204,000 ounces inferred (83.3 Mt at 1.20 g/t Au), clustered within four kilometres.

The Company's public documents may be accessed at [www.sedar.com](http://www.sedar.com). For further information on the Company, please visit our website at [www.monetaporcupine.com](http://www.monetaporcupine.com) or email us at [info@monetaporcupine.com](mailto:info@monetaporcupine.com).

This news release includes certain forward-looking information and forward-looking statements, collectively "forward-looking statements" within the meaning of applicable Canadian securities legislation. Forward-looking statements are frequently identified by such words as "may", "will", "plan", "expect", "anticipate", "estimate", "intend" and similar words referring to future events and results. Forward-looking statements include, but are not limited to information with respect to the future performance of the business, its operations and financial performance and condition such as the Company's drilling program and the timing and results thereof; and the ability of the Company to finance and carry out its anticipated goals and objectives.

Forward-looking statements are based on the current opinions and expectations of management. All forward-looking information is inherently uncertain and subject to a variety of assumptions, risks and uncertainties, including the speculative nature of mineral exploration and development, fluctuating commodity prices, competitive risks and the availability of financing, as described in more detail in our recent securities filings available at [www.sedar.com](http://www.sedar.com). Actual events or results may differ materially from those projected in the forward looking-statements and we caution against placing undue reliance thereon. We assume no obligation to revise or update these forward-looking statements.
