## About Beauce Gold Fields

BGF is a wholly owned subsidiary of HPQ Silicon into which HPQ gold assets were transferred. Subject to approval by TSX-V, HPQ is in the process of listing BGF as a new public junior gold company., following the approval by shareholders during HPQ AGM held on Aug. 10, 2018, of the proposed terms of the plan of arrangement.

The Beauce Gold Fields project is a unique, historically prolific gold property located in the municipality of Saint-Simon-les-Mines in the Beauce region of Southern Quebec. Comprising of a block of 152 claims 100% owned by HPQ, the project area hosts a six kilometre long unconsolidated gold-bearing sedimentary unit (a lower saprolite and an upper brown diamictite). Textural observations (angularity) of gold nuggets suggest a relatively proximal source and therefore a short transport distance. The gold in saprolite indicates a close proximity to a bedrock source of gold, providing possible further exploration discoveries. The property was also hosts numerous historical gold mines that were active from 1860s to the 1960s (see HPQ SEDAR-filed

report).
